

Remedial Spelling Spelling Made Easy

One factor that characterises the field of dyslexia remediation is the stream of alternative therapies for developmental and learning disabilities. These controversial treatments include nutritional supplements, special diets, homeopathy, and osteopathy/chiropractic manipulation.

The rhyme is very well known; Edward Carney calls it "this supreme, and for many people solitary, spelling rule". However, the short form quoted above has many common exceptions; for example:

Vera Southgate was a prolific author of academic papers, developed the Southgate reading tests, and served on the Bullock government inquiry. She also evaluated the initial teaching alphabet on behalf of the British government. Her final major research project was a five-year study aimed at improving the reading skills of older children. The resulting publication, *Extended Beginning Reading*, won the UK Reading Association's Book of the Year award.

The MoonScoop Group announced a sequel series titled *Code Lyoko: Evolution* that ran for one season and consisted of 26 episodes. The series revolves around a gang of boarding-school students who travel to the virtual world of Lyoko, within a quantum supercomputer, to battle XANA, a malevolent AI/multi-agent system who desires to rule all of humanity.

Some teaching is geared to specific reading skill areas, such as phonetic decoding; whereas other approaches are more comprehensive in scope, combining techniques to address basic skills along with strategies to improve comprehension and literary appreciation. Many programs are multisensory in design, meaning that instruction includes visual, auditory, and kinesthetic or tactile elements; as it is generally believed that such forms of instruction are more effective for dyslexic learners.

Rationale

Individual needs may be addressed in resource rooms as indicated in a student's Individualized Education Plan (IEP). Special education instructors in a resource room focus on particular goals as mandated by an IEP and remedial general education curriculum. Some programs emphasize the development of executive skills, including homework completion and behavior.

Depending on individual needs, students usually attend resource rooms three to five times per week for about forty-five minutes per day. Some research has suggested these classrooms are of particular benefit to students with...

Writing assessment Writing assessment can also refer to the technologies and practices used to evaluate student writing and learning. An important consequence of writing assessment is that the type and manner of assessment may impact writing instruction, with consequences for the character and quality of that instruction. Indirect assessments, such as Compass, are used to place students into remedial or mainstream writing courses. Writing assessment can be considered a combination of scholarship from composition studies and measurement theory within educational assessment. Direct writing assessments, like Writeplacer Writing assessment refers to an area of study that contains theories and practices that guide the evaluation of a writer's performance or potential through a writing task

Phonics is also known as the alphabetic principle or the alphabetic code. To use phonics is to teach the relationship between the sounds of the spoken language (phonemes), and the letters (graphemes) or groups of letters or syllables of the written language. Phonics is also sometimes used as part of the process of teaching people from China (and other foreign students) to read and write Chinese characters, which are not alphabetic, using pinyin, which is alphabetic. It can be used with any writing system that is alphabetic, such as that of English, Russian, and most other languages
