History of mathematics From 3000 BC the Mesopotamian states of Sumer, Akkad and Assyria, followed closely by Ancient Egypt and the Levantine state of Ebla began using arithmetic, algebra and geometry for taxation, commerce, trade, and in astronomy, to record time and formulate calendars. Before the modern age and worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales. Before the modern The history of mathematics deals with the origin of discoveries in mathematics and the mathematical methods and notation of the past. The history of mathematics deals with the origin of discoveries in mathematics and the mathematical methods and notation of the past 811e11e4a3

The earliest mathematical texts available are from Mesopotamia and Egypt - Plimpton 322 (Babylonian c. 2000 - 1900 BC), the Rhind Mathematical Papyrus (Egyptian c. 1800 BC) and the Moscow Mathematical Papyrus (Egyptian c. 1890 BC). All these texts mention... 811e11e4a3 Originally called infinitesimal calculus or "the calculus of infinitesimals", it has two major branches, differential calculus and integral calculus. The former concerns instantaneous rates of change, and the slopes of curves, while the latter concerns accumulation of quantities, and areas under or between curves. These two branches are related to each other by the fundamental theorem of calculus. They make use of the fundamental notions of convergence of infinite sequences and infinite series to a well-defined limit. It is the "mathematical backbone" for dealing with problems where variables change with time or another... 811e11e4a3
