Automatic number-plate recognition In Stockholm, Sweden, ANPR is used for the
Stockholm congestion tax Automatic number-plate recognition (ANPR; see also other
names below) is a technology that uses optical character recognition on images to
read vehicle registration plates to create vehicle location data. It can use existing
closed-circuit television, road-rule enforcement cameras, or cameras specifically
designed for the task. ANPR is used by police forces around the world for law
enforcement purposes, including checking if a vehicle is registered or licensed. It is
also used for electronic toll collection on pay-per-use roads and as a method of
cataloguing the movements of traffic, for example by highways agencies. Some of the

freeways with ANPR are the N12, N3, N1 etc. travelled on the particular freeway
