Traffic message channel country, the service is available in Eclipse, Garmin, iPhone (Navigon), Navman, Navway, Mio, Pioneer, TomTom and Uniden navigation systems, as well as Traffic Message Channel (TMC) is a technology for delivering traffic and travel information to motor vehicle drivers. When data is integrated directly into a navigation system, traffic information can be used in the system's route calculation. It is digitally coded using the ALERT C or TPEG protocol into Radio Data System (RDS) carried via conventional FM radio broadcasts. It can also be transmitted on Digital Audio Broadcasting or satellite radio. Both public and commercial services are operational in many countries. TMC allows silent delivery of dynamic information suitable for reproduction or display in the user's language without interrupting audio broadcast services
