

Lizards Frogs And Polliwogs

The best-known source of many English words used for collective groupings of animals is The Book of Saint Albans, an essay on hunting published in 1486 and attributed to Juliana Berners. Most terms used here may be found in common dictionaries and general information web sites. Adult frogs have a stout body, protruding eyes, anteriorly-attached tongue, limbs folded underneath, and no tail (the "tail" of tailed frogs is an extension of the male cloaca). Frogs have glandular skin, with secretions...

Douglas Florian "LIZARDS, FROGS, AND POLLIWOGS by Douglas Florian". the original on December 5, 2022. March 12, 2001. Retrieved May 20, 2026. He has exhibited his paintings in dozens of solo and group shows in such venues as The Arts Council of Princeton, The Drawing Center, The Center for Maine Contemporary Art, BravinLee Programs, and Bienvenu, Steinberg & C. Publishers Weekly. Archived Douglas Florian is a New York-based visual artist and poet

List of generation II Pokémon Archived from the original on The second generation (generation II) of the Pokémon franchise features 100 fictional species of creatures introduced to the core video game series in the Game Boy Color games Pokémon Gold and Silver. The generation was unveiled at the beginning of the Nintendo Space World '97 event. GamesRadar+. Partner Pokemon Will Be Revealed for Scarlet and Violet Tomorrow – But Players Are Pretty Sure It's a Frog". Gold and Silver were first released on November 21, 1999, in Japan

The terms in this table apply to many or all taxa in a particular biological family, class, or clade. He has also published more than fifty children's books, including the award-winning Mammalabilia, Insectlopedia, Dinothesaurus, and Poetrees. In 2012 Poets House exhibited a retrospective of his art and poetry, entitled A Florianthology.

Frog Adult frogs have a stout body, protruding eyes, anteriorly-attached tongue, limbs folded underneath, and no tail (the

“tail”; of tailed frogs is an extension A frog is any member of a diverse and largely semiaquatic group of short-bodied, tailless amphibian vertebrates composing the order Anura (coming from the Ancient Greek ἀνούρα, literally 'without tail'). Frog species with rough skin texture due to wart-like parotoid glands tend to be called toads, but the distinction between frogs and toads is informal and purely cosmetic, and does not reflect taxonomy or evolutionary history

Florian was born in New York City on March 18, 1950, to Harold and Edith Florian. He received a Bachelor of Arts from Queens College, City University of New York in 1973, after which he attended the School of Visual Arts.

The following list details the 100 Pokémon of the second generation in order of their in-game "Pokédex" index order. Alternate forms introduced in subsequent games in the series, such as Mega Evolutions and regional variants, are included...

Frogs are widely distributed, ranging from the tropics to subarctic regions, but the greatest concentration of species diversity is in tropical rainforest and associated wetlands. They account for around 88% of extant amphibian species, and are one of the five most diverse vertebrate orders. The oldest fossil "proto-frog" Triadobatrachus is known from the Early Triassic of Madagascar (250 million years ago), but molecular clock dating suggests their divergence from other amphibians may extend further back to the Permian, 265 million years ago.

The games are set in the Johto region, which is based on the real-world Kansai region of Japan. Due to the games acting as a sequel to the first generation of the franchise, the Pokémon designs of the second generation share a strong association with those from the first. Some Pokémon in this generation were introduced in animated adaptations of the franchise before Gold and Silver were released. The games also introduced several new types of Pokémon, introducing the elemental types Dark and Steel, a subset of Pokémon called "Baby Pokémon", and differently colored versions of Pokémon called Shiny Pokémon.
