Intelligence cycle management The cycle consists of several processes, including planning and direction (the focus of this article), collection, processing and exploitation, analysis and production, and dissemination and integration. to get policymakers to provide guidance for both collection and analysis, to communicate not just what they want but also what they do not. Intelligence organizations are not infallible (intelligence reports are often referred to as "estimates," and often include measures of confidence and reliability) but, when properly managed and tasked, can be among the most valuable tools of management and government. " The CFR

proposed Intelligence cycle management refers to the overall activity of guiding the intelligence cycle, which is a set of processes used to provide decision-useful information (intelligence) to leaders. The related field of counterintelligence is tasked with impeding the intelligence efforts of others 7d0325938d
