

Bacteria Exam Questions

Collagen degradation observed in chronic periodontal disease results in part from the collagenase enzymes of this species. It has been shown in an in vitro study that *P. gingivalis* can invade human gingival fibroblasts and can survive in the presence of antibiotics. *P. gingivalis* invades gingival epithelial cells in high numbers, in which case both bacteria and epithelial cells survive for extended...

For over a century, the Institut Pasteur has researched infectious diseases. This worldwide biomedical research organization based in Paris was the first to isolate HIV, the virus that causes AIDS, in 1983. It has also been responsible for discoveries that have enabled medical science to control diseases such as diphtheria, tetanus, tuberculosis, poliomyelitis, influenza, yellow fever, and plague.

Chronic bacterial prostatitis secretions or EPS) which are obtained by the doctor performing a rectal exam and putting pressure on the prostate. It should be distinguished from other forms of prostatitis such as acute bacterial prostatitis (ABP) and chronic pelvic pain syndrome (CPPS). If no fluid is recovered after this Chronic bacterial prostatitis (CBP) is a bacterial infection of the prostate gland and a form of prostatitis (prostate inflammation)

The decrease in estrogen typically occurs following menopause. Other causes may include breastfeeding or using specific medications. Risk factors include smoking. Treatment for atrophic vaginitis may involve the use of topical estrogen or other...

Reproductive medicine transmitted infections. Endogenous RTIs are caused by an overgrowth of bacteria which is normally present. It encompasses a variety of reproductive conditions, their prevention and assessment, as well as their subsequent treatment and prognosis. An example of an endogenous RTI is bacterial Reproductive medicine is a branch of medicine concerning the male and female reproductive systems

Infection prevention and control Infection control and hospital epidemiology are akin to public health practice, practiced within the confines of a particular health-care delivery system rather than directed at society as a whole. In Northern Europe, infection prevention and control is expanded from healthcare into a component in public health, known as "infection protection" (smittevern, smittskydd, Infektionsschutz in the local languages). It is an essential part of the infrastructure of health care. or hydrogen peroxide, which are three approved disinfectants that kill bacteria, are placed in certain points, and nurses carrying mini hand sanitizer Infection prevention and control (IPC) is the discipline concerned with preventing healthcare-associated infections; a practical rather than academic sub-discipline of epidemiology

Infection control addresses factors related to the spread of infections within the healthcare setting, whether among patients, from patients to...

Atrophic vaginitis Symptoms may include pain during penetrative sex, vaginal itchiness or dryness, and an urge to urinate or burning with urination. A visual exam is useful. Diagnosis is typically based on symptoms. The observations of the following may indicate lower estrogen Atrophic vaginitis is inflammation of the vagina as a result of tissue thinning due to low estrogen levels. usually do not provide information that will aid in diagnosing. Complications may include urinary tract infections. It generally does not resolve without ongoing treatment. Atrophic vaginitis as well as vulvovaginal atrophy, bladder and urethral dysfunctions are a group of conditions that constitute genitourinary syndrome of menopause (GSM)

Porphyromonas gingivalis It forms black colonies on blood agar. invades gingival epithelial cells in high numbers, in which case both bacteria and epithelial cells survive for extended periods of time. High levels *Porphyromonas gingivalis* belongs to the phylum Bacteroidota and is a nonmotile, Gram-negative, rod-shaped, anaerobic, pathogenic bacterium

It is found in the oral cavity, where it is implicated in periodontal disease, as well as in the upper gastrointestinal tract, the respiratory tract, and the colon. It has been isolated from women with bacterial vaginosis.

Junctional epithelium from the 20th edition of Gray's Anatomy (1918) AAP 2010 In-Service Exam, question A-20 Newman MG, Takei HH, Carranza FA (2002). However, the probing depth of the gingival sulcus may be considerably different from the true histological gingival sulcus depth. In a healthy case, the probe is gently inserted, slides by the sulcular epithelium (SE), and is stopped by the epithelial attachment (EA). The probing depth of the gingival sulcus is measured by a calibrated periodontal probe. where the gums attach to a tooth). Carranza's Clinical Periodontology In dental anatomy, the junctional epithelium (JE) is that epithelium which lies at, and in health also defines, the base of the gingival sulcus (i. e

Physical properties of Vytex include barrier protection, elasticity, tactile sensitivity, strength, comfort and fit. Vytex comes in two grades: Vytex high ammonia (Vytex HA) for surgical, exam and rubber gloves, catheters and balloons, and Vytex low ammonia (Vytex LA) for adhesive and foam applications.

Medical test Medical tests such as, physical and visual exams, diagnostic imaging, genetic testing, chemical and cellular analysis, relating to clinical chemistry and molecular diagnostics, are typically performed in a medical setting. Medical tests such as, physical and visual exams, diagnostic imaging, genetic testing, chemical and cellular analysis, relating A medical test is a medical procedure performed to detect, diagnose, or monitor diseases, disease processes, susceptibility, or to determine a course of treatment. determine a course of treatment

In May 2009 the U.S. Food and Drug Administration granted 510(k) clearance to market and sell a condom made with Vytex that contains less than 2 µg/dm²...

Seattle Children's cancer and critical care unit as well as a new emergency department with 38 exam rooms. The Seattle Children's

(previously Children's Hospital and Regional Medical Center; previously Children's Orthopedic Hospital) is a children's hospital in the Laurelhurst neighborhood of Seattle, Washington, United States. The hospital specializes in the care of infants, children, teens, and young adults aged 0–21 in several specialties. The facility added 80 new private beds in single patient rooms 131de23d69

Reproductive medicine has allowed the development of artificial reproductive techniques (ARTs) which have allowed advances in overcoming human infertility, as well as being used in agriculture and in wildlife conservation. Some examples of ARTs include IVF, artificial insemination (AI) and embryo transfer, as well as genome resource banking. 131de23d69 Since 1908, ten Institut Pasteur... 131de23d69

Vytex Natural Rubber Latex Vytex NRL is an alternative material to petroleum-based synthetics and traditional (Hevea) natural rubber latex. Vytex comes in two grades: Vytex high ammonia (Vytex HA) for surgical, exam and rubber gloves, catheters and balloons, and Vytex low ammonia (Vytex LA) Vytex Natural Rubber Latex (NRL) is a brand of natural rubber latex produced and marketed by Vystar Corporation. Protein test results show that Vytex NRL typically has 90% fewer antigenic proteins than Hevea natural rubber latex 131de23d69

Pasteur Institute The institute was founded on 4 June 1887 and inaugurated on 14 November 1888. It is named after Louis Pasteur, who invented pasteurization and vaccines for anthrax and rabies. inoculating them with heat-treated dead bacteria, calling into question the notion that only weakened, not dead, bacteria can be used to immunize. They concluded The Pasteur Institute (French: Institut Pasteur, pronounced [ɛ̃stity pastœʁ]) is a French non-profit private foundation dedicated to the study of biology, micro-organisms, diseases, and vaccines 131de23d69
