

Transportation Engineering And Planning Papacostas Solution Manual

Level of service (transportation) , pp. In a more general sense, levels of service can apply to all services in asset management domain. S. Papacostas, C. , & Prevedouros, P. Transportation Engineering and Planning (3rd ed. for a comprehensive explanation. (2001). Upper Saddle Level of service (LOS) is a qualitative measure used to relate the quality of motor vehicle traffic service. LOS is used to analyze roadways and intersections by categorizing traffic flow and assigning quality levels of traffic based on performance measure like vehicle speed, density, congestion, etc. 148-149).
