Continuous track , CLAAS Continuous track or tracked treads are a system of vehicle propulsion used in tracked vehicles, running on a continuous band of treads or track plates driven by two or more wheels. The large surface area of the tracks distributes the weight of the vehicle better than steel or rubber tyres on an equivalent vehicle, enabling continuous tracked vehicles to traverse soft ground with less likelihood of becoming stuck due to sinking. have been replaced mostly by large tractor companies such as AGCO,

Liebherr Group, John Deere, Yanmar, New Holland, Kubota, Case, Caterpillar Inc

Driverless tractor Andrew invented his own. The idea of a driverless tractor has been around since as early as 1940, when Frank W. The various driverless tractors are split into full autonomous technology and supervised autonomy. To guide his driverless A driverless tractor is an autonomous farm vehicle that delivers a high tractive effort (or torque) at slow speeds for the purposes of tillage and other agricultural tasks. The idea of the driverless tractor appears as early as 1940, but the concept has significantly evolved in the last few years. The tractors use GPS and other wireless technologies to farm land without requiring a. manned tractor in lead. It is considered driverless because it operates without the presence of a human inside the tractor itself. Like other unmanned ground vehicles, they are programmed to independently observe their position, decide speed, and avoid obstacles such as people, animals, or objects in the field while performing their task
