Industrial Revolution before the Industrial Revolution. The textile industry. Output greatly increased, and the result was an unprecedented rise in population and population growth. The Industrial Revolution witnessed the triumph of a middle class of industrialists and businessmen over a landed class The Industrial Revolution, sometimes divided into the First Industrial Revolution and Second Industrial Revolution, was a transitional period of the global economy toward more widespread, efficient and stable manufacturing processes, succeeding the Second Agricultural Revolution. Beginning in Great Britain around 1760, the Industrial Revolution had spread to continental Europe and the United States by about 1840. This transition included going from hand production methods to machines; new chemical manufacturing and iron production processes; the increasing use of water power and steam power; the development of machine tools; and rise of the mechanised factory system c38a74a28f
