Hercules was originally developed as a simple upgrade to the earlier MIM-3 Nike Ajax, allowing it to carry a nuclear warhead in order to defeat entire formations of high-altitude supersonic targets. It evolved into a much larger missile with two solid fuel stages that provided three times the range of the Ajax. M7 grenade launcher Green, Michael (2000). The M7 was a tube-shaped device, with one end slotting over the muzzle of the rifle and attaching to the bayonet mount, and the other end holding the grenade in place. ISBN 978-1-85109-960-3. Weapons of Patton's Armies The M7 grenade launcher, formally rifle grenade launcher, M7, was a 22 mm rifle grenade launcher attachment for the M1 Garand rifle that saw widespread use throughout World War II and the Korean War. When fired, the expanding gases generated by the cartridges propelled the grenade forward with considerable force. 430. p.). of the Vietnam War: A Political, Social, and Military History (2 ed. The M7 could fire grenades up to 200 metres (220 yards), compared with the maximum of 30 metres (33 yards) achieved by a hand-thrown grenade. Nike Hercules and NATO armed forces for medium- and high-altitude long-range air defense. S. LOPAR. Its warhead also allowed it to be used in a secondary surface-to-surface role, and the system also demonstrated its ability to hit other short-range missiles in flight. It was normally armed with the W31 nuclear warhead, but could also be fitted with a conventional warhead for export use. HIPAR used its own displays and operators, and forwarded targeting information to the LOPAR operators who would then pick up those same targets The Nike Hercules, initially

designated SAM-A-25 and later MIM-14, was a surface-to-air missile (SAM) used by U 53c82def33

Amateur radio its operator.). The term "radio amateur" is used to specify "a duly authorized person interested in radioelectric practice with a purely personal aim and without pecuniary interest" (either direct monetary or other similar reward); and to differentiate it from commercial broadcasting, public safety (police and fire), or two-way radio professional services (maritime, aviation, taxis, etc. In the case of commercial stations and amateur club stations, the operator is a corporation; in the case of amateur radio operators, the Amateur radio, also known as ham radio, is the use of the radio frequency spectrum for purposes of non-commercial exchange of messages, wireless experimentation, self-training, private recreation, radiosport, contesting, and emergency communications 53c82def33

Motor controller Motor controllers may be manual, requiring an operator to sequence a starting switch through steps to accelerate the A motor controller is a device or group of devices that can coordinate in a predetermined manner the performance of an electric motor. Motor controllers may use electromechanical switching, or may use power electronics devices to regulate the speed and direction of a motor. A motor controller might include a manual or automatic means for starting and stopping the motor, selecting forward or reverse rotation, selecting and regulating the speed, regulating or limiting the torque, and protecting against overloads and electrical faults. more slowly than a direct connection 53c82def33

Supervisory control autonomously, reports the results and awaits further commands. With manual control, the operator interacts directly with a controlled process or task using switches. Supervisory control is a general term for control of many individual controllers or control loops, such as within a distributed control system. It refers to a high level of overall monitoring of individual process controllers, which is not necessary for the operation of each controller, but gives the operator an overall plant process view, and allows integration of operation between controllers

Station group (railway) National Fares Manuals. Section A. To accommodate this requirement, British Rail introduced a series of station groups: notional "common locations" to which tickets from stations outside that group would be issued. Journal of the Transport Ticket Society (430). Kemsing: The Transport In the ticketing system of the British rail network, tickets are normally issued to and from individual stations. In some instances, when there is more than one station in a town or other locality—especially where these are on different routes—it may be desirable for passengers to be able to travel to one station and back from another, or more generally to be able to choose which of the stations they wish to travel to. Bell, Gordon, "Computer Structures: Readings Scientific Data Systems (SDS), was an American computer company founded in September 1961 by Max Palevsky, Arthur Rock and Robert Beck, veterans of Packard Bell Corporation and Bendix, along with eleven other computer scientists. The company concentrated on larger scientific workload focused machines and sold many machines to NASA during the Space Race 53c82def33

The Therac-25 was involved in at least six accidents between 1985 and 1987, in which some patients were given massive overdoses of radiation. Because of concurrent programming errors (also known as race conditions), it sometimes gave its patients radiation doses that were hundreds of times greater than normal, resulting in death or serious injury. These accidents highlighted the dangers of software control of safety-critical systems. 53c82def33

Detroit Diesel Series 60 rating was 430 hp (321 kW), and whilst the cruise control is engaged, the horsepower rating increased to 470 hp (350 kW), encouraging operators to take advantage The Detroit Diesel Series 60 is an inline-six 4 stroke diesel engine produced from 1987 to 2011. 1 L (677 cu in) displacement. At that time, it differed from most on-highway engines by using an overhead camshaft and "drive by wire" electronic control. In 1993, it was popular on many USA buses in the 11 53c82def33

A more specific use of the term is for a Supervisory Control and Data Acquisition system or SCADA, which refers to a specific class of system for use in process control, often on fairly small and remote applications such as a pipeline transport, water distribution, or wastewater utility system station. 53c82def33
