Sanielevici and his friend Garabet Ibrăileanu were among the founders of "Poporanism", a peasant-oriented and left-wing movement. “Improving CUR matrix decomposition and the Nyström approximation via adaptive sampling” (PDF). Major advances in this field can result from advances in learning algorithms (such as deep learning), computer hardware, and, less-intuitively, the availability of high-quality training datasets. Although they do not need to be labeled, high-quality datasets for unsupervised learning can also be difficult and costly to produce. Shusen; Zhang, Zhihua
