In actual practice the advantage will be reduced by friction in the pulleys or carabiners. The advantage will also be reduced if the pull on the hauling end is not parallel to the direction the load moves in. The name comes from the fact that the arrangement of lines is roughly Z-shaped. Besides the mechanical advantage to pulling, it also uses only part of the total length of the rope for the block and tackle arrangement. The typical configuration (see diagram) uses two single pulleys and two... An electric current, in the form of either alternating current or direct current from a welding power supply, is used to form an electric arc between the electrode and the metals to be joined. The workpiece and the electrode melts forming a pool of molten metal (weld pool) that cools to form a joint. As the weld is laid, the flux coating of the

electrode disintegrates, giving off vapors that serve as a shielding gas and providing a layer of slag, both of which protect the weld area from atmospheric contamination. 3aef7b12cb All voices may be shaped by 13 preset envelopes, portamento, and vibrato. It also includes a rudimentary sequence recorder, preset rhythms and chord accompaniment. The SK-1 was thus an unusually full-featured synth in the sub-US\$100 (equivalent to \$290 today) home keyboard market of the time. 3aef7b12cb

The term borrowing of scenery ("shakkei") is Chinese in origin, and appears in the 17th century garden treatise Yuanye 3aef7b12cb

The Decoration of Houses In the book, the authors denounce Victorian-style interior decoration and interior design, especially rooms decorated with heavy window curtains, Victorian bric-a-brac and overstuffed furniture. Wharton and Codman advocated the creation of houses with rooms decorated with strong architectural wall and ceiling treatments, accentuated by well-suited furniture, rooms based on simple, classical design principles such as symmetry and proportion and a sense of architectural balance. The Decoration of Houses, a manual of interior design written by Edith Wharton with architect Ogden Codman, was first published in 1897. They argue that such rooms emphasize upholstery at the expense of proper space planning and architectural design and are, therefore, uncomfortable and rarely used.
