History of submarines propulsion system for submarines is the magnetohydrodynamic drive, or "caterpillar drive", which has no moving parts. While early attempts, such as those by Alexander the Great, were rudimentary, the advent of new propulsion systems, fuels, and sonar, propelled an increase in submarine technology. Humanity has employed a variety of methods to travel underwater for exploration, recreation, research and significantly, warfare. It was popularized in the movie version The history of the submarine goes back to antiquity. The introduction of the diesel engine, then the nuclear submarine, saw great expansion in submarine use — and specifically military use — during World War I, World War II, and the Cold War 19f4d8fe9a
