Computer-assisted language learning 1) briefly defines it as "the exploration and study of computer applications in language teaching and learning. " CALL embraces a wide range of information and communications technology "applications and approaches to teaching and learning foreign languages, ranging from the traditional drill-and-practice programs that characterized CALL in the 1960s and 1970s to more recent manifestations of CALL, such as those utilized virtual learning environment and Web-based distance learning. It also extends to the use of corpora and concordancers, interactive whiteboards, computer. computer-assisted learning (CAL) in British English and computer-aided language instruction (CALI) and computer-aided instruction (CAI) in American English, Levy (1997: Computer-assisted language learning (CALL), known as computer-assisted learning (CAL) in British English and computer-aided language instruction (CALI) and computer-aided instruction (CAI) in American English, Levy (1997: p cc1959274d

Obelia There are currently 120 known species, with more to be discovered. longissima was later accepted as a legitimate species, but taxonomy regarding the entire genus is debated over. These species are grouped into three broad categories: O. dichotoma, and O. called gastrozooids, which can be found expanded or contracted, to aid in the growth of this organism by feeding. geniculata. The reproductive polyp gonozooids have Obelia is a genus of hydrozoans, a class of mainly marine and some freshwater animal species that have both polyp and medusa stages in their life cycle. bidentata, O. Hydrozoa belongs to the phylum Cnidaria, which are aquatic (mainly marine) organisms that are relatively simple in structure with a diameter around 1mm. O cc1959274d

History of India The earliest known human remains in South Asia date to 30,000 years ago. The Vedic Period of the Vedic people in northern India (1500–500 BCE) was marked by. New Delhi: Anatomically modern humans first

arrived on the Indian subcontinent between 73,000 and 55,000 years ago. Sedentariness began in South Asia around 7000 BCE; by 4500 BCE, settled life had spread, and gradually evolved into the Indus Valley Civilisation, one of three early cradles of civilisation in the Old World, which flourished between 2500 BCE and 1900 BCE in present-day Pakistan and north-western India. The Ancient History of India, Vedic Period: A New Interpretation. C. Science. Indo-Aryan tribes moved into the Punjab from Central Asia in several waves of migration. Singhal, K. Early in the second millennium BCE, persistent drought caused the population of the Indus Valley to scatter from large urban centres to villages. Bacterial taxonomy manual of Systematic Bacteriology, which aims to aid in the identification of species and is considered the highest authority. Archaeal taxonomy are governed by the same rules. HAL HF-24 Marut The first phase of the project sought The HAL HF-24 Marut ("Spirit of the Tempest") is an Indian jet fighter aircraft developed and manufactured by Hindustan Aeronautics Limited (HAL) during the 1960s and early 70s. The Marut was designed by the German aeronautical engineer Kurt Tank, with the Project Engineer being George William Benjamin. The aircraft was the first Indian-developed jet fighter. the development of the aircraft, stating that it would aid in the development of a modern aircraft industry in India. On 17 June 1961, the type conducted its maiden flight; on 1 April 1967, the first production Marut was officially delivered to the IAF cc1959274d

Flow cytometry and related methods allow the quantification of multiple independent biomarkers on large numbers of single cells. The rapid growth in the multidimensionality and throughput of flow cytometry data, particularly in the 2000s, has led to the creation of a variety of computational analysis methods, data standards, and public databases for the sharing of results. cc1959274d Computational methods exist to assist in the...

In the scientific classification established by Carl Linnaeus, each species is assigned to a genus resulting in a two-part name. This name denotes the two lowest levels in a hierarchy of ranks, increasingly larger groupings of species based on common traits. Of these ranks, domains are the most general level of categorization. Presently, scientists classify all life into just three domains, Eukaryotes, Bacteria and Archaea. cc1959274d Bacterial taxonomy is the classification of strains within the domain Bacteria into hierarchies of similarity. This classification is similar to that of plants, mammals, and other taxonomies. However, biologists... cc1959274d

Clostridioides difficile infection It makes up about 20% of cases of antibiotic-associated diarrhea. 09. Complications may include pseudomembranous colitis, toxic megacolon, perforation of the colon, and sepsis. PMID 22019794. "Association of Gastric Acid Suppression With Recurrent Clostridium Clostridioides difficile infection (CDI or C-diff), also known as Clostridium difficile infection, is a symptomatic infection due to the spore-forming bacterium Clostridioides difficile. Tariq R, Singh S, Gupta A, Pardi DS, Khanna S (June 2017). 030. 2011. Symptoms include watery diarrhea, fever, nausea, and abdominal pain. Antibiotics can contribute to detrimental

changes in gut microbiota; specifically, they decrease short-chain fatty acid absorption, which results in osmotic, or watery, diarrhea cc1959274d

Oxygen therapy It may also be prophylactically given to maintain blood oxygen levels during the induction of anesthesia. Many emergency medical service members, first aid personnel Oxygen therapy, also referred to as supplemental oxygen, is the use of oxygen as medical treatment. to manually deliver artificial respiration with supplemental oxygen delivered through a mask port. It can also be given through bypassing the airway, such as in ECMO therapy. Oxygen can be delivered via nasal cannula, face mask, or endotracheal intubation at normal atmospheric pressure, or in a hyperbaric chamber. Oxygen therapy is often useful in chronic hypoxemia caused by conditions such as severe COPD or cystic fibrosis. Acute indications for therapy include hypoxemia (low blood oxygen levels), carbon monoxide toxicity and cluster headache. Supplemental oxygen can also refer to the use of oxygen enriched air at altitude cc1959274d
