Skeleton (computer programming) It may involve empty function declarations, or functions that return a correct result only for a simple test case where the expected response of the code is known. Program skeletons resemble pseudocode, but allow parsing, compilation and testing of the code. With Java's focus on scope, data types and inheritance, this syntax is extremely useful for new, if not all programmers. Dummy code is inserted in a program skeleton to simulate processing and avoid compilation error messages. This is followed by an in-depth Skeleton programming is a style of computer programming based on simple high-level program structures and so called dummy code

Skeleton programs are utilized in the template method design pattern used in object-oriented programming. In object-oriented programming, dummy code corresponds to an abstract method, a method stub or a mock object. In the Java remote method... Skeleton programming facilitates a top-down design approach, where a partially functional system with complete high-level structures is designed and coded, and this system is then progressively expanded to fulfill the requirements of the project. Program skeletons are also sometimes used for high-level descriptions of algorithms. A program skeleton may also be utilized as a template that reflects syntax and structures commonly used in a wide class of problems.

The Trackers (2013) ISBN 978-0-9738025-3-5 fa86c3e427 In 2007, a lot of work was done to implement support for Java's two graphical APIs in GNU Classpath: AWT and Swing. Software support for AWT was incomplete. "Once AWT support is working then Swing support can be considered. There is at least one free-software partial implementations of Swing that may be usable.". By the time of its removal, GCC had support for up to version 1.4 of Java (and thus lacked support for most of the later features, such as generics, annotations, or JPMS modules; despite this, portions of the java.nio library were implemented). GNU Classpath was never completed to even Java 1.2 status and now appears to have... fa86c3e427 == History == fa86c3e427
