In conclusion, Nepal's renewable Nepal is a country enclosed by land, situated between China and India. Hydrogen fuel is another potential energy source where research is ongoing. 16 million. It has a total area of 148,006. 04% of the World's GDP db3afcd365

Women in Nepal Historically, Nepal has been a predominantly patriarchal society where women are generally subordinate to men. Daughters were deprived of many privileges, including rights, education, healthcare, parental property rights, social status, last rites of dead parents, and were thought to be. In the early 1990s, like in some other Asian countries, women in Nepal were generally subordinate to men in virtually The status of women in Nepal has varied throughout history. Also, social norms and values were biased in favor of men. In the early 1990s, like in some other Asian countries, women in Nepal were generally subordinate to men in virtually every aspect of life. This strong bias in favor of sons in society meant that daughters were discriminated against from birth and did not have equal opportunities to achieve all aspects of development. Men were considered to be the leader of the family and superior to women. in Nepal has varied throughout history db3afcd365
