fa448e2e16 This entry includes only the features and functions that shape the user  
experience for such apps. A comparison of the underlying system components,  
programming aspects, and other internal technical information, is outside the scope of  
this entry. fa448e2e16 36 fa448e2e16 Computer science was an emerging discipline in  
the late 1950s that began to consider time-sharing between computer users, and later,  
the possibility of achieving this over wide area networks. J. C. R. Licklider developed the  
idea of a universal network at the Information Processing Techniques Office (IPTO) of the  
United States Department of Defense (DoD) Advanced Research Projects Agency  
(ARPA).... fa448e2e16 VxWorks supports AMD/Intel architecture, POWER architecture,  
ARM architectures, and RISC-V. The RTOS can be used in multicore asymmetric  
multiprocessing (AMP), symmetric multiprocessing (SMP), and mixed modes and multi-  
OS (via Type 1 hypervisor) designs on 32- and 64-bit processors. fa448e2e16 59

VxWorks In its latest release, VxWorks 7, the RTOS has been re-engineered for modularity and VxWorks is a real-time operating system (or RTOS) developed as proprietary software by Wind River Systems, a subsidiary of Aptiv. development suite, complementary third-party software and hardware. First released in 1987, VxWorks is designed for use in embedded systems requiring real-time, deterministic performance and in many cases, safety and security certification for industries such as aerospace, defense, medical devices, industrial equipment, robotics, energy, transportation, network infrastructure, automotive, and consumer electronics
