Usability testing This is in contrast with usability inspection methods where experts use different methods to evaluate a user interface without involving users. Such testing is paramount to the success of an end product as a fully functioning application that creates confusion amongst its users will not last for long. This can be seen as an irreplaceable usability practice, since it gives direct input on how real users use the system. This can be seen as an irreplaceable Usability testing is a technique used in user-centered interaction design to evaluate a product by testing it on users. It is more concerned with the design intuitiveness of the product and tested with users who have no prior exposure to it.
