Tacking the legal estate refers to the holder of an equitable mortgage getting better security by obtaining legal title to the security (whether by way of mortgage or otherwise). Usually this is

prompted by their discovery, after they took their security, that there is an earlier equitable mortgage over the same asset. The effect of the tacking is to postpone (i.e., demote) the rights of the first creditor to those of the second: this follows the general principle that a legal interest takes priority over an equitable one. e56d9b7d83

Although forms of cheques have been in use since ancient times and at least since the 9th century, they became a highly popular non-cash method for making payments during the 20th century and usage of cheques peaked. By the second half of the 20th century, as cheque processing became automated, billions of cheques were issued annually; these volumes peaked in or around the early 1990s. Since then, cheque usage has fallen, being replaced by electronic payment systems, such as debit cards, credit cards, and mobile payments. In an increasing number of countries, cheques have either become... e56d9b7d83 Aaron ben David Hayyun e56d9b7d83

Enterprise law mediates the rights and duties of investors, workers, consumers and the public to ensure efficient production, and deliver services that UK and international law sees as universal human rights. The National Health Service was set up in 1946 to provide everyone with free health care, regardless of class or income, paid for by progressive taxation. Universities and schools have traditionally been publicly established, and socially regulated, to ensure universal education. Labour, company, competition and insolvency law create general rights for stakeholders, and set a basic framework for enterprise governance, but rules of governance, competition and insolvency are altered in specific enterprises to uphold the public interest, as well as civil and social rights. Private enterprises are usually incorporated under the Companies Act 2006, regulated by company law, competition law, and insolvency law, while almost one third of the workforce and half of the UK economy is in enterprises subject to special regulation.
