Timeline of Polish science and technology the isolation of cortisone. In 1364, King Casimir III the Great founded the Cracow Academy, which would become one of the great universities of Europe. Władysław Świątecki, Polish physicist noted for pioneering research in nuclear physics including the nuclear shell model and Education has been of prime interest to Poland's rulers since the early 12th century. The Polish people have made considerable contributions in the fields of science, technology and mathematics. The catalog of the library of the Cathedral Chapter in Kraków dating from 1110 shows that Polish scholars already then had access to western European literature. The list of famous scientists in Poland begins in earnest with the polymath, astronomer and mathematician Nicolaus Copernicus, who formulated the heliocentric theory and sparked the European Scientific Revolution 93313f8385

Antimony 729. The earliest known description of this metalloid in the West was written in 1540 by Vannoccio Biringuccio. Antimony compounds have been known since ancient times and were powdered for use as medicine and cosmetics, often known by the Arabic name kohl. A lustrous grey metal or metalloid, it is found in nature mainly as the sulfide mineral stibnite (Sb<sub>2</sub>S<sub>3</sub>). Bibcode:2003NuPhA. &quot;The NUBASE evaluation of nuclear and decay properties&quot;. Nuclear Physics A. 729: 3–128. 3A. Wapstra, Aaldert Hendrik (2003). doi:10 Antimony is a chemical element; it has symbol Sb (from Latin stibium) and atomic number 51 93313f8385

93313f8385 The German language, along with English and French, was one of the leading languages of science from the late 19th century until the end of World War II. After the war, because so many scientific researchers' and teachers' careers had been ended either... 93313f8385

Science and technology in Germany Germany is currently the nation with the 3rd most Nobel Prize winners, 115. James Franck, Physics, 1925 Gustav Ludwig Hertz, Physics, 1925 Otto Fritz Meyerhof, Physiology or Medicine, 1922 Albert Einstein, Physics, 1921 Walther Science and technology in Germany has a long and illustrious history, and research and development efforts form an integral part of the country's economy. Before World War II, Germany had produced more Nobel laureates in scientific fields than any other nation, and was the preeminent country in the natural sciences. Germany has been the home of some of the most prominent researchers in various scientific disciplines, notably physics, mathematics, chemistry and engineering 93313f8385

China is the largest producer of antimony and its compounds, with most production coming from the Xikuangshan Mine in Hunan. The industrial methods for refining antimony from stibnite are roasting followed by reduction with carbon, or direct reduction of stibnite with iron. 93313f8385 Talk:(S,S)-Tetrahydrochrysene 93313f8385 Talk:17-beta-hydroxysteroid... 93313f8385 Talk:1,4-Dioxin 93313f8385 Talk:11 $\beta$ -Hydroxyprogesterone 93313f8385 Talk:16 $\alpha$ -Iodo-E2 93313f8385 Talk:13q deletion syndrome 93313f8385
