The area affected by artificial illumination continues to increase. A major side effect of urbanization, light pollution is blamed for compromising health, disrupting ecosystems, and spoiling aesthetic environments. Studies show that urban areas are more at risk. Globally, it has increased by at least 49% from 1992 to 2017, and between 2014 and 2022 by 16%, with uneven development, e.g. France reducing through policy its light pollution by 33% in that time period. adf7155360
