The use of staples over sutures reduces the local inflammatory response, width of the wound, and time it takes to close a defect. 019. doi:10. 33 (4): 408–11. g. Teoh, MK; Bird, DA (1 September 1987), "Removal of skin staples in an emergency" Surgical staples are specialized staples used in surgery in place of sutures to close skin wounds or to resect and/or connect parts of an organ (e. 2006. ejvs 2d2c309d83

The word has had a variety of negative connotations. In modern-day English, it is usually regarded as offensive. In the 21st century, coolie is generally considered a racial slur for Asians in Oceania, Africa, Southeast Asia, and the Americas (particularly in the Caribbean). 2d2c309d83

Coolie in 1833, with other European nations eventually following suit. In the 19th century, during the British colonial era, the term was adopted for the transportation and employment of Asian labourers via employment contracts on sugar plantations formerly worked by enslaved Africans. Labour-intensive work in European colonies, such as those involving plantations and mines Coolie () is a derogatory term used for low-wage labourers, typically those of Indian or Chinese descent. In the 18th century, the term more commonly referred to migrant Indian indentured labourers. The word coolie was first used in the 16th century by European traders across Asia 2d2c309d83

By breathing gas source: self-contained gas supply... 2d2c309d83 While polymeric membranes are economical and technologically useful, they are bounded by their performance, known as the Robeson limit (permeability must be sacrificed for selectivity and vice versa). This limit affects polymeric membrane use for CO2 separation from flue gas streams, since mass transport becomes limiting and CO2 separation becomes very expensive due to low permeabilities. Membrane materials have expanded into the realm of silica, zeolites, metal-organic frameworks, and perovskites due to their strong thermal and chemical resistance as well as high tunability (ability to be modified and functionalized), leading to increased permeability... 2d2c309d83 Breathing apparatus may be classified by type in several ways: 2d2c309d83

Breathing apparatus A respirator, medical ventilator, or resuscitator may also be considered to be breathing apparatus. Equipment that supplies or recycles breathing gas other than ambient air in a space used by several people is usually referred to as being part of a life-support system, and a life-support system for one person may include breathing apparatus, when the breathing gas is specifically supplied to the user rather than to the enclosure in which the user is the occupant. hand-operated bag valve

mask. Ventilators are chiefly used in intensive-care medicine, home care, and emergency medicine (as standalone units) and in anesthesiology. A breathing apparatus or breathing set is equipment which allows a person to breathe in a hostile environment where breathing would otherwise be impossible, difficult, harmful, or hazardous, or assists a person to breathe. 2d2c309d83

A more recent development, from the 1990s, uses clips instead of staples for some applications; this does not require the staple to penetrate. 2d2c309d83
