Investigations in Numbers, Data, and Space arithmetic, geometry, data, measurement and early algebra. As opposed to referring to textbooks and having teachers impose methods for solving arithmetic problems, the TERC program uses a constructivist approach that encourages students to develop their own understanding of mathematics. The curriculum underwent a major revision in 2005–2007. The curriculum is often referred to as Investigations or simply TERC. Patterned after the NCTM standards for mathematics, it is among the most widely used of the new reform mathematics curricula. Unlike traditional methods, the original edition did not provide student textbooks to describe Investigations in Numbers, Data, and Space is a K-5 mathematics curriculum, developed at TERC in Cambridge, Massachusetts, United States b699709e5a

, is a mathematical expression with different interpretations depending on the context. In certain areas of mathematics, such as combinatorics and algebra, 00 is conventionally defined as 1 because this assignment simplifies many formulas and ensures consistency in operations involving exponents. For instance, in combinatorics, defining 00 = 1 aligns with the interpretation of choosing 0 elements from a set and simplifies polynomial and binomial expansions. b699709e5a
