The centripetal force is directed at right angles to the motion and also along the radius towards the centre of the circular path. The mathematical... bfd800c755 100%_J.U.I.C.E. bfd800c755

Centripetal force Isaac Newton coined the term, describing it as "a force by which bodies are

drawn or impelled, or in any way tend, towards a point as to a centre". Cambridge University Press. Ginsberg (2007). p. ISBN 978-0-521-88303-0 Centripetal force (from Latin centrum, "center" and petere, "to seek") is the force that makes a body follow a curved path. ISBN 978-0-521-35883-5. In Newtonian mechanics, gravity provides the centripetal force causing astronomical orbits. p. Jerry H. Cambridge University Press. Engineering Dynamics. 20. 33. The direction of the centripetal force is always orthogonal to the motion of the body and towards the fixed point of the instantaneous center of curvature of the path bfd800c755
