AP Computer Science Principles Assessment for AP Computer Science Principles is divided into two parts: a Create Performance Task due during the course, as well as an AP exam. The course is designed as an equivalent to a first-semester course in computing. 2 Written Responses Advanced Placement (AP) Computer Science Principles (also known as AP CSP) is an AP Computer Science course and examination offered by the College Board under the Advanced Placement program. The ACT was first introduced... 69e9e5239c It derives its name from the problem faced by someone who is constrained by a fixed-size knapsack and must fill it with the most valuable items. The problem often arises in resource allocation where the decision-makers have to choose from a set of non-divisible projects or tasks under a fixed budget or time constraint, respectively. 69e9e5239c

The Common Lisp language was developed as a standardized and improved successor of MacLisp. By the early 1980s several groups were already at work on diverse successors to MacLisp: Lisp Machine Lisp (aka ZetaLisp), Spice Lisp, NIL and S-1 Lisp. Common Lisp sought to unify, standardise, and extend the features of these MacLisp dialects. Common Lisp is not an implementation, but rather a language specification. Several implementations of the Common Lisp standard are available, including free... 69e9e5239c

AP Computer Science Principles examines a variety of computing topics on a largely conceptual level, and teaches procedural programming. In the Create "Through-Course Assessment", students must develop a program, demonstrated in a video and a written reflection. The course may be taught in any programming language with procedures, mathematical expressions, variables, lists, conditionals... 69e9e5239c The multiple-choice test sections of the ACT (all except the optional writing test) are individually scored on a scale of 1–36. In addition, a composite score consisting of the rounded whole number average of the scores for English, reading, and math is provided. 69e9e5239c Metaweb was acquired by Google in 2010. Google shut down Freebase in 2016, transferring some of the data that met the required notability criteria to Wikidata. 69e9e5239c Benchmarks generally consist of a dataset and corresponding evaluation metrics. The dataset provides text samples and annotations, while the metrics measure a model's performance on tasks like question answering, text classification, and machine translation. These benchmarks are developed and maintained by academic institutions, research organizations, and industry players to track progress in the field. 69e9e5239c The SAT is wholly owned, developed, and published by the College Board and is administered by the Educational Testing Service.
