Heuristic Heuristics can be mental shortcuts that ease the cognitive load of making a decision. Homeostasis – State of steady internal conditions maintained by living things
Entropy – Property of a thermodynamic system George Polya studied and published A heuristic or heuristic technique (problem solving, mental shortcut, rule of thumb) is any approach to problem solving that employs a pragmatic method that is not fully optimized, perfected, or rationalized, but is nevertheless "good enough" as an approximation or attribute substitution. Where finding an optimal solution is impossible or impractical, heuristic methods can be used to speed up the process of finding a satisfactory solution

Addiction While mice given cocaine showed the compulsive and involuntary nature of addiction, for humans this is more complex, related to behavior. incorporating the substance into its "normal" functioning - i. e. , attains homeostasis - and therefore physical withdrawal symptoms occur on cessation of use. Repetitive drug use can alter brain function in synapses similar to natural rewards like food or falling in love in ways that perpetuate craving and weakens self-control for people with pre-existing vulnerabilities. This phenomenon - drugs reshaping brain function - has led to an understanding of addiction as a brain disorder with a complex variety of psychosocial as well as neurobiological factors that are implicated in the development of addiction. Addiction is a neuropsychological disorder characterized by a persistent and intense urge to use a drug or engage in a behavior that

produces natural reward, despite substantial harm and other negative consequences

Psychological stress Journal of Personality and Social In psychology, stress is a feeling of emotional strain and pressure. Excessive amounts of stress, however, can increase the risk of strokes, heart attacks, ulcers, and mental illnesses such as depression and also aggravate pre-existing conditions. Small amounts of stress may be beneficial, as it can improve athletic performance, motivation and reaction to the environment. "Mutual reinforcement between neuroticism and life experiences: a five-wave, 16-year study to test reciprocal causation". Stress is a form of psychological and mental discomfort 66df12ea8d

Addiction psychology Journal of Comparative and Physiological About 1 in 7 Americans reportedly suffered from active addiction to a particular substance. Addiction can cause physical, emotional and psychological harm to those affected by it. "Positive reinforcement produced by electrical stimulation of septal area and other regions of rat brain";. (1954) 66df12ea8d

Psychology As social scientists, psychologists aim to understand the behavior of individuals and groups. Its subject matter includes the behavior of humans and nonhumans, both conscious and unconscious phenomena, and mental Psychology is the scientific study of mind and behavior. Psychology is an academic discipline of immense scope, crossing the boundaries between the natural and social sciences. Its subject matter includes the behavior

Psychological stress can be external and related to the environment, but may also be caused by internal perceptions that cause an individual to experience anxiety or other negative emotions surrounding a situation, such as pressure, discomfort, etc., which they then deem stressful.
