Educational assessment high-stakes testing include Fairtest and Alfie Kohn. Assessment is often used interchangeably with test but is not limited to tests. The word "assessment" came into use in an educational context after the. Assessment data can be obtained by examining student work directly to assess the achievement of learning outcomes or it is based on data from which one can make inferences about learning. Assessment can focus on the individual learner, the learning community (class, workshop, or other organized group of learners), a course, an academic program, the institution, or the educational system as a whole (also known as granularity). The use of IQ tests has been banned in some states for educational decisions, and norm-referenced tests, which Educational assessment or educational evaluation is the systematic process of documenting and using empirical data on the knowledge, skill, attitudes, aptitude and beliefs to refine programs and improve student learning
