The list of correct permissions is compiled by consulting the various bill-of-materials (.bom) files. Typically, these files are stored within reduced-size Installer package (.pkg) files in the Receipts folder in the local Library directory (/Library/Receipts) on the volume being checked. Whenever a user installs software that uses the macOS Installer package format, a bill-of-materials file is created which can be consulted for future permission repair. 808204d82f Add or change partition table between Apple Partition Map, GUID Partition Table, and master boot record (MBR) 808204d82f
