Personality test Most personality assessment instruments (despite being loosely referred to as "personality tests") are in fact introspective (i. , subjective) self-report questionnaire (Q-data, in terms of LOTS data) measures or reports from life records (L-data) such as rating scales. One exception, however, was the Objective-Analytic Test Battery, a performance test designed to quantitatively measure 10 factor-analytically discerned personality trait dimensions. Most personality assessment instruments (despite being loosely referred to as A personality test is a method of assessing human personality constructs. A personality test is a method of assessing human personality constructs. Attempts to construct actual performance tests of personality have been very limited even though Raymond Cattell with his colleague Frank Warburton compiled a list of over 2000 separate objective tests that could be used in constructing objective personality tests. A major. e 796344b701
