Engle Peak is located 7 miles (11 km) east of Noxon, Montana, along the boundary of the Cabinet Mountains Wilderness, on land managed by Kaniksu National Forest. It is set west of the Continental Divide in the Cabinet Mountains which are a subrange of the Rocky Mountains. Precipitation runoff from the mountain's south slopes drains to McKay Creek, whereas the north slope drains into Engle Lake and Rock Creek, and both creeks are tributaries of the Clark Fork River. Topographic relief is significant as the summit rises 1,500 feet (460 m) above Engle Lake in one-half mile (0.8 km). Engle Lake is named after pioneer Isaac Engle (1855–1928) who homesteaded nearby. Engle Peak is named after Roy Engle of Noxon who saved the lives of 25 crewmembers fighting a 1910 forest fire. The mountain's toponym has been officially adopted by the U.S. Board on Geographic Names, and has appeared in publications since 1875. An ascent of the summit involves hiking 3.9 miles with 3,489-feet of elevation gain on the Engle Peak Trail.
