Computer-supported collaborative learning CSCL can be implemented in online and classroom learning environments and can take place synchronously or asynchronously. This kind of learning is characterized by the sharing and construction of knowledge among participants using technology as their primary means of communication or as a common resource. 1970s as cognitivism gained traction with educators, designers began to envision learning technology that employed artificial intelligence models that could Computer-supported collaborative learning (CSCL) is a pedagogical approach wherein learning takes place via social interaction using a computer or through the Internet 1e0b4be8c7

Augmented reality This experience is seamlessly interwoven with the physical world such that it is perceived as an immersive aspect of the real environment. Augmented reality is typically visual, but can span multiple sensory modalities, including auditory, haptic, and somatosensory. "The Master Key"; L. Johnson, Joel. Frank Baum envisions augmented reality glasses in 1901 Mote & Beam 10 September 2012 Augmented reality (AR), also known as mixed reality (MR), is a technology that overlays real-time 3D-rendered computer graphics onto a portion of the real world through a display, such as a handheld device or head-mounted display. pdf [Accessed 30 October 2020]. In this way, augmented reality alters one's ongoing perception of a real-world environment, compared to virtual reality, which aims to completely replace the user's real-world environment with a simulated one 1e0b4be8c7

While basic calculations are not considered original research, the pricing statements in the examples require interpretation of primary sources that may not be straightforward. This makes the editorial claims difficult to verify, and especially so for drugs whose prices are not widely discussed in published sources. In addition, there are concerns that proper explanation of the situation for the indicated price would give the price undue weight. 1e0b4be8c7
