

Teaching The Layers Of The Rainforest Foldables

Mammal Around 6,640 extant species of mammals have been described and divided into 27 orders. significant driver of deforestation and habitat destruction; species-rich habitats, such as significant portions of the Amazon rainforest, are being converted A mammal (from Latin mamma 'breast') is a vertebrate animal of the class Mammalia (). Mammals are characterised by the presence of milk-producing mammary glands for feeding their young, a broad neocortex region of the brain, fur or hair, and three middle ear bones. These characteristics distinguish them from reptiles and birds, from which their ancestors diverged in the Carboniferous Period over 300 million years ago. The study of mammals is called mammalogy

Entomologists reserve the term bug for Hemiptera or Heteroptera, which does not include other arthropods or insects of other orders such as ants, bees, beetles, or butterflies. In some varieties of English, all terrestrial arthropods (including non-insect arachnids and myriapods) also fall under the colloquial understanding of bug. Many insects... Termites comprise the infraorder Isoptera, or alternatively the epifamily Termitoidae, within the order Blattodea (the cockroaches). Termites were once classified in a separate order from cockroaches, but recent phylogenetic studies indicate that they evolved from cockroaches, as they are deeply nested within the...

2012 in science A total of 72 successful orbital spaceflights occurred in 2012, and the year also saw numerous developments in fields such as robotics, 3D printing, stem cell research and genetics. discovered what appears to be the remains of an ancient rainforest from the early Eocene period buried deep beneath the ice. A study published in Animal The year 2012 involved many significant scientific events and discoveries, including the first orbital rendezvous by a commercial spacecraft, the discovery of a particle highly similar to the long-sought Higgs boson, and the near-eradication of guinea worm disease. Over 540,000 technological patent applications were made in the United States alone in 2012

2013 in science that claims the IPCC has underestimated the impacts on the southern part of the rainforest. The year also saw successful new treatments for diseases such as HIV, Usher syndrome and leukodystrophy, and a major expansion in the use and capabilities of technologies such as 3D printing and autonomous cars. 22 October – Astronomers have discovered the 1,000th known A number of significant scientific events occurred in 2013, including the discovery of numerous

Earthlike exoplanets, the development of viable lab-grown ears, teeth, livers and blood vessels, and the atmospheric entry of the most destructive meteor since 1908

2012 was declared the International Year of Sustainable Energy for All by the United Nations. 2012 also marked Alan Turing Year, a celebration of the life and work of the English mathematician, logician, cryptanalyst and computer scientist Alan Turing.

Manav Gupta genius; and a ;visionary;. He has been acknowledged as one of the most versatile and erudite contemporary artists to come from India and is widely regarded as a 'maverick genius' and a 'visionary'. He has reinvented the identity of rural Indian clay pottery and redeployed various other material like construction scrap to create site specific, contemporary art and environmental installations and sculptures. He has conceptualised and created multiple layers of interdisciplinary engagements at his installations and exhibitions, with Manav Gupta (born 29 December 1967) is an Indian contemporary artist known for his paintings, installations and large-scale public art projects on environment consciousness and sustainable development

Umbanda usually the spirits of indigenous Brazilians, especially those of the Amazon Rainforest. Deriving largely from Spiritism, it also combines elements from Afro-Brazilian traditions like Candomblé as well as Roman Catholicism. In Umbanda, they are regarded as hunters and warriors who are Umbanda (Portuguese pronunciation: [ũ'bẽdɐ]) is a religion that emerged in Brazil during the 1920s. There is no central authority in control of Umbanda, which is organized around autonomous places of worship termed centros or terreiros, the followers of which are called Umbandistas

Cameron's only stage play, The Prophet at Tantramar, was about Leon Trotsky's month-long confinement in a prisoner-of-war camp in Amherst, Nova Scotia...

List of World Heritage Sites in China Cultural heritage consists of monuments (such as architectural works, monumental sculptures, or inscriptions), groups of buildings, and sites (including archaeological sites). Archived from the original on 21 February 2025. Retrieved 22 February 2025. "Hainan Tropical Rainforest and the Traditional Settlement of Li Ethnic Group"; The United Nations Educational, Scientific and Cultural Organization (UNESCO) World Heritage Sites are places of importance to cultural or natural heritage as described in the UNESCO World Heritage Convention, established in 1972. Natural features (consisting of physical and biological formations), geological and physiographical formations (including habitats of threatened species of animals and plants), and natural sites which are important from the point of view of science, conservation or natural beauty, are

defined as natural heritage. China accepted the convention on 12 December 1985, making its sites eligible for

Termite They are distinguished by their moniliform antennae and the soft-bodied, unpigmented worker caste for which they have been commonly termed "white ants"; however, they are not ants but highly derived cockroaches. cent of dry wood in the semiarid savannah ecosystems of Africa and Asia are reprocessed by these termites. Originally living in the rainforest, fungus Termites are a group of detritophagous eusocial cockroaches which consume a variety of decaying plant material, generally in the form of wood, leaf litter, and soil humus. About 2,997 extant species are currently described, 2,125 of which are members of the family Termitidae

An avid sailor, Cameron wrote several books about ships and the sea. He was the author of a young adult novel and a thriller, both set in Nova Scotia where he lived for more than 40 years. Two of his books, *The Education of Everett Richardson* (1977 and 2019) and *The Living Beach* (1998), are included in Atlantic Canada's 100 Greatest Books. Adherents of this monotheistic religion believe in a single God who is distant from humanity. Beneath this entity are powerful non-human spirits called orixás. In the more Spiritist-oriented wing of the religion, White Umbanda, these are viewed as divine energies or forces of nature; in more Africanised forms they are seen as West African deities and are offered animal sacrifices... The largest orders of mammals, by number of species, are the rodents, bats, and eulipotyphlans (including hedgehogs, moles and shrews). The next three are the primates (including humans, monkeys and lemurs), the even-toed ungulates (including pigs,... He has conceptualised and created multiple layers of interdisciplinary engagements at his installations and exhibitions, with other art forms, and outreach programmes with students, educational institutes, the general... The United Nations designated 2013 the International Year of Water Cooperation.

Silver Donald Cameron His 15 books of non-fiction dealt with everything from history and politics to education and community development. The geology looks like frozen violence: layers of rock bent, twisted, broken, folded, thrust Silver Donald Cameron (June 21, 1937 – June 1, 2020) was a Canadian journalist, author, playwright, and university teacher whose writing focused on social justice, nature, and the environment. shifts of colour from pink to white, rust, green, grey, black

Venezuela Cretaceous, folded in an anticline structure. It comprises an area of 916,445 km² (353,841 sq mi), and its population was estimated at 29 million in 2022. The capital and largest urban agglomeration is the city of Caracas. Between these orographic systems there are plains covered with tertiary and quaternary layers of gravel, sands Venezuela, officially the Bolivarian Republic of Venezuela, is

a country on the northern coast of South America, consisting of a continental landmass and many islands and islets in the Caribbean Sea. The continental territory is bordered on the north by the Caribbean Sea and the Atlantic Ocean, on the west by Colombia, Brazil on the south, Trinidad and Tobago to the north-east and on the east by Guyana. Venezuela is among the most urbanized countries in Latin America; the vast majority of Venezuelans. Venezuela consists of 23 states, the Capital District, and federal dependencies covering Venezuela's offshore islands

Hemiptera herbivores (Cicadellidae: Typhlocybinae) on rainforest trees in Papua New Guinea: local and regional diversity of a taxonomically unexplored guild
 Ecological Hemiptera (; from Ancient Greek hemipterus 'half-winged') is an order of insects, commonly called true bugs, comprising more than 80,000 species within groups such as the cicadas, aphids, planthoppers, leafhoppers, assassin bugs, bed bugs, and shield bugs. The name "true bugs" is sometimes limited to the suborder Heteroptera. They range in size from 1 mm (0. 04 in) to around 15 cm (6 in), and share a common arrangement of piercing-sucking mouthparts
