

Terra Muta

List of lakes of Italy There are more than 1000 lakes in Italy, the largest of which is Garda (370 km² or 143 sq mi). lake (Lago di San Floriano) Lago di San Giuliano Lago di San Valentino alla Muta Lake Santa Croce (Lago di Santa Croce) Santa Croce Lake (Lago di Santa Croce) The following is a list of lakes of Italy. The lakes of Italy can be distinguished, depending on their location within the national territory, between pre-alpine, north-western, Apennine, Sicilian and Sardinian, in addition to lagoons and coastal lakes. They are generally named after the surrounding towns and often their capacity has been increased with the construction of dams, in order to create large water reserves to be used for the production of electricity 054471b8ca

The Japurá-Solimões-Negro moist forests lies to the north of the Japurá. 054471b8ca The ecoregion lies on the lowland plateau in the interfluvial between the Rio Negro and the Solimões River. 054471b8ca There are 118 mons and montes currently recognized by the International Astronomical Union. Six features were formerly classified as mons but have since been reclassified or removed from nomenclature entirely. Notably, Skadi Mons, which was once believed to be the tallest peak on Venus, has since been labeled as a misidentified feature after it was determined in 2025 that it does not correspond to any summit or distinct topographic feature. 054471b8ca == Location == 054471b8ca It has a hot climate with high rainfall throughout the year, and holds one of the most diverse collections of fauna and flora in the world. 054471b8ca == Location == 054471b8ca There are also lakes along the Italian coasts. They were formed by the wave motion of the sea, which, first of all in the inlets, accumulated... 054471b8ca == Sentiment == 054471b8ca The Purus várzea forms the south east border, and elements of the Purus várzea are found along rivers throughout the Solimões-Japurá ecoregion. 054471b8ca The Caqueta separates the ecoregion from the Caquetá moist forests to the north. 054471b8ca The Solimões-Japurá moist forests has an area of 16,757,223 hectares (41,408,000 acres) divided among Colombia, Brazil and Peru. 054471b8ca

Tu che le vanità Addio, bei sogni d'ôr, illusion perduta. It was composed to a French text and later translated into Italian,

the language in which it is most well known and most often performed. Il nodo si spezzò, la luce è fatta muta. Cedendo al duol crudel, Il core ha un sol desir: "Tu che le vanità" (French: "Toi qui sus le néant", lit. Sopranos also use it as an audition piece, as it displays the singer's high and low registers, forte and pianissimo volumes, legato bel canto singing technique, and several dramatic emotions such as reverence, longing, and resignation. Addio, verd'anni, ancor. 'You who knew the emptiness') is an aria for soprano from the first scene of the final act of Verdi's 1867 opera Don Carlo. It is sometimes performed in recitals and featured in anthologies for dramatic sopranos 054471b8ca

The Caqueta becomes the Japurá River when it crosses Colombia's border with Brazil, and the Japurá (or the Purus várzea along the Japurá) defines the northern boundary in Brazil to the point where the Japurá meets the Solimões River. 054471b8ca

Giuseppe Pelle 'ndrangheta", La Repubblica, September 30, 2011 (in Italian) La 'ndrangheta muta pelle, regole e gerarchie Archived 2015-07-22 at the Wayback Machine, Gazzetta Giuseppe Pelle (Italian pronunciation: [dʒu'zɛppe 'pɛlle]; born 20 August 1960) is an Italian criminal from San Luca, and member of the 'Ndrangheta, a Mafia-type organisation in Calabria. He is the son of Antonio Pelle, also known as Ntoni Gambazza, the capo crimine, the ceremonial head of the 'Ndrangheta 054471b8ca

It extends west into Colombia, where it includes the south of El Tuparro National Natural Park, and extends to the southeast into the Brazilian states of Amazonas and Roraima, including part of the Pico da Neblina National Park. 054471b8ca == Arval rite == 054471b8ca Despite its name, the tree is not a horse chestnut. Rather, the tree's name originated from a legend in which a Spanish queen, Joanna of Castile... 054471b8ca In March 2010, the police managed to place a bug in the home of Pelle. "In the house they talked about the 'Ndrangheta twelve hours a day," according to prosecutor Nicola Gratteri, "they felt safe and discussed freely." In just over a month hundreds of meetings were recorded between mafiosi, politicians, entrepreneurs, professionals, businessmen and middlemen of any kind... 054471b8ca

Trás-os-Montes pronunciation: [ˌtraz uʒ 'mõtiʃ] Mirandese: Trás-ls-Muntes [ˌtraz̺ (ə)ɫ̺ 'mũtəʃ] is a geographical, historical and cultural region of Portugal. Portuguese Trás-os-Montes (Portuguese pronunciation: [ˌtraz uʒ 'mõtiʃ] Mirandese: Trás-ls-Muntes

[ˌtɾaz̺(ə)ʎ̺ 'mũtəʃ] is a geographical, historical and cultural region of Portugal 054471b8ca

It overlays the Casiquiare Rift. 054471b8ca Conservation units include the Jaú National Park and the Mamirauá Sustainable Development Reserve. 054471b8ca In Colombia the region skirts the foothills of the Guiana Shield to the northwest, and contains the lower Vaupés River basin and the land south of the Guainía River, the name of the upper Rio Negro in Colombia. 054471b8ca == 'Ndrangheta heritage == 054471b8ca

Mother of the Lares Brethren as Mater Larum, elsewhere as Mania and Larunda. Ovid calls her Lara, Muta (the speechless one) and Tacita (the silent one). Cult to Matres Larum is The Mother of the Lares (Latin Mater Larum) has been identified with any of several minor Roman deities. Ovid calls her Lara, Muta (the speechless one) and Tacita (the silent one). She appears twice in the records of the Arval Brethren as Mater Larum, elsewhere as Mania and Larunda 054471b8ca

Hundred Horse Chestnut con catene invisibili alla terra, tende le braccia multiple di sfinge scagliando contro il cielo e contro il fato una muta minaccia ebbra di guerra. Translation: The Hundred-Horse Chestnut (Italian: Castagno dei Cento Cavalli; Sicilian: Castagnu dî Centu Cavaḍḍi) is the largest and oldest known sweet chestnut (*Castanea sativa*, family Fagaceae) in the world 054471b8ca

Almost all of the ecoregion is in the central northern part of the Brazilian Amazon basin, with a small portion in Colombia. 054471b8ca The pre-alpine lakes are the largest and most important because they constitute capacious basins, in which the alpine rivers restrain their impetus and purify their waters, depositing the transported materials. They also affect the local climate, mitigating it. Their waters fill the bottom of long valleys that flow into the Po Valley. They are deep valleys, carved by glaciers, which once descended to the foot of the Alpine chain. Generally, their emissary rivers then flow into the Po River. 054471b8ca

List of montes on Venus Four major mountain ranges of Venus are Akna Montes, Danu Montes, Freyja Montes, and Maxwell Montes. They are on the Ishtar Terra, surrounding the Lakshmi Planum. They are on the Ishtar Terra, surrounding the Lakshmi

Planum. There are 118 mons and montes currently This is a list of montes (mountains, singular mons) on the planet Venus. The largest peaks are clustered in the northern hemisphere of the planet. Danu Montes, Freyja Montes, and Maxwell Montes 054471b8ca

Venusian mountain belts are typically characterized by having many parallel ridges and troughs, similar to the mountain ranges on Earth. These mountain ranges appear to have been formed by the compressive tectonic folding and buckling of Venus's crust, similar to mountain formation on Earth. However, Venusian mountains have steep slopes due to a lack of erosion; there exist no rivers or glaciers to erode the mountains, and other causes of erosion... 054471b8ca It also adjoins or contains areas of Rio Negro campinarana. 054471b8ca

Negro-Branco moist forests The vegetation is more typical of the Guiana region than the Amazon. It lies on the watershed between the Orinoco and Rio Negro basins. It includes both blackwater and whitewater rivers, creating different types of seasonally flooded forest. (Micrurus genus), boa constrictors (Boa constrictor) and bushmasters (Lachesis muta). There are many green iguanas (Iguana iguana) and tegus lizards (Tupinambis The Negro-Branco moist forests (NT0143) is an ecoregion of tropical moist broadleaf forest to the east of the Andes in southern Venezuela, eastern Colombia and northern Brazil, in the Amazon biome 054471b8ca

Portuguese for "behind the mountains", Trás-os-Montes is located northeast of the country in an upland area, landlocked by the Douro and Tâmega rivers to south and west and by the Spanish communities of Galicia and Castile and León to the north and east. This relative isolation has led to the survival of cultural traditions that mark the Portuguese identity. On the other hand, its relative continentality also contributed to the lack of development, which led its inhabitants to seek better conditions on the coast or emigrate to Brazil and to other European countries such as France, Luxembourg and Switzerland. 054471b8ca The region is then bounded by the Rio Negro along the border with Venezuela and into Brazil to its confluence with the Solimões at Manaus. 054471b8ca

Solimões-Japurá moist forests Fish include silver arowana (*Osteoglossum bicirrhosum*), tetras (*Hyphessobrycon* The Solimões-

Japurá moist forests (NT0163) is an ecoregion in northwest Brazil and eastern Peru and Colombia in the Amazon biome. constrictor), emerald tree boa (*Corallus caninus*), and bushmaster (*Lachesis muta*) 054471b8ca

The Iquitos várzea... 054471b8ca The southern border is defined by the Japurá River from the border with Colombia to the point where it meets the Solimões at Tefé, then by the Solimões to the Rio Negro. 054471b8ca The Japurá-Solimões-Negro moist forests ecoregion is named for the Japurá, Solimões, and Negro rivers. 054471b8ca The Japurá-Solimões-Negro moist forests adjoin the... 054471b8ca The center of the ecoregion is in the extreme south of Venezuela, and covers part of the Parima Tapirapécó National Park. 054471b8ca The Purus várzea and then the Iquitos várzea along the Solimões define the southern boundary in Brazil and Peru. 054471b8ca The northern boundary of the western portion in Colombia is defined by the Caqueta River. 054471b8ca Cult to Matres Larum is known through the fragmentary Arval rites to Dea Dia, a goddess of fruitfulness. The Arvals address Dia herself as Juno Dea Dia, which identifies her with the supreme female principle. The mother of the Lares is addressed only as Matres Larum; she is given a sacrificial meal (*cena matri Larum*) of puls (porridge) contained in a sacred, sun-dried earthenware pot (*olla*). Prayers are recited over the pot, which is then thrown from the temple doorway, down the slope on which the temple stands; thus, remarks Lily Ross Taylor, towards the earth as a typically chthonic offering. On another occasion, the Arvals offer sacrificial recompense to various deities for a necessary pollution of Dia's sacred grove; the Mater Larum is given two sheep. The Arvals also invoke her children, in the opening lines of the Arval Hymn to Dia, which begins *enos Lases iuvate* ("Help us, Lares"... 054471b8ca Located on Linguaglossa road in Sant'Alfio, on the eastern slope of Mount Etna in Sicily — only 8 km (5 miles) from the volcano's crater — it is generally believed to be 2,000 to 4,000 years old (4,000 according to botanist Bruno Peyronel from Turin). 054471b8ca It adjoins the Caquetá and Japurá-Solimões-Negro moist forests to the south, the Llanos grasslands to the north, the Guianan piedmont and lowland moist forests to the east and the Uatuma-Trombetas moist forests to the southeast. 054471b8ca == History == 054471b8ca Guinness World Records has listed it for the record of "Greatest Tree Girth Ever", noting that it had a circumference of 57.9 m (190 ft) when it was measured in 1780. Above ground, the tree has since split into multiple large trunks, but below ground, these trunks still share the same roots. An early 1895 image with a man next to the tree for perspective shows it was closer to 10 m (33 ft) in diameter at breast height, rather than the claimed 18.5 m (61 ft) in diameter at breast height. At present time it has a girth (130 cm or 4+1/4 ft) circumference of 10.51 m

(34 ft) and it is 19.42 m (64 ft) high. 054471b8ca == Location == 054471b8ca It has an area of 26,961,776 hectares (66,624,000 acres). 054471b8ca The aria begins with a long, c. 3 minutes, orchestral prelude. Élisabeth de Valois, a young French Princess whom the elderly King Philip II of Spain has married for political reasons, prays at the tomb of the former Emperor King Carlos V. She asks that he weep for her suffering and offer his tears to the Almighty on her behalf. She anticipates the arrival of her stepson and former fiancé Don Carlo, whom she has piously rejected after marrying his father the King in order to strengthen the alliance of their two nations. She prays that Carlos... 054471b8ca The ecoregion has an area of 21,289,702 hectares (52,608,000 acres) 054471b8ca Giuseppe was the second-born son of the undisputed leader of one of the most powerful clans of San Luca, Antonio Pelle and Giuseppa Giampaolo. His older brother Salvatore Pelle, wanted by the authorities since 1991, was arrested on March 10, 2007, making Giuseppe the acting boss of the clan. One of the four sons of Antonio Pelle, Giuseppe married Marianna Barbaro, a daughter of the 'Ndrangheta boss Francesco Barbaro from Platì, securing a tight alliance between these two powerful 'ndrine. 054471b8ca

Japurá-Solimões-Negro moist forests The rivers are home to fish of all sizes, turtles, Amazon river dolphin The Japurá-Solimões-Negro moist forests (NT0132) is an ecoregion of tropical moist broad leaf forest in the Amazon biome. (Bothriechis species), coral snakes (Micrurus species) and bushmasters (Lachesis muta) 054471b8ca

The ecoregion is relatively intact. 054471b8ca
