Theory of constraints 3 (2002): 73-80 The theory of constraints (TOC) is a management paradigm that views any manageable system as being limited in achieving more of its goals by a very small number of constraints. That means that organizations and processes are vulnerable because the weakest person or part can always damage or break them, or at least adversely affect the outcome. TOC adopts the common idiom "a chain is no stronger than its weakest link". 13 (2009): 3705-3739 Nave, Dave. There is always at least one constraint, and TOC uses a focusing process to identify the constraint and restructure the rest of the organization around it.
