

Experiencing Lifespan Janet Belsky

Developmental psychology Developmental psychologists aim to explain how thinking, feeling, and behaviors change throughout life. This field examines change across three major dimensions, which are physical development, cognitive development, and social emotional development. expanded to include adolescence, adult development, aging, and the entire lifespan. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire lifespan. Developmental psychologists aim to explain how thinking, feeling, and Developmental psychology is the scientific study of how and why humans grow, change, and adapt across the course of their lives. Within these three dimensions are a broad range of topics including motor skills, executive functions, moral understanding, language acquisition, social change, personality, emotional development, self-concept, and identity formation 59661b16c2
