The earliest known anatomically modern human was from Tabon Caves in Palawan dating about 47,000 years. Negrito groups were the first inhabitants to settle in the prehistoric Philippines. These were followed by Austroasiatics, Papuans, and South Asians. By around 3000 BCE, seafaring Austronesians, who form the majority of the current population, migrated southward from Taiwan. 41749fbd63 2822305 41749fbd63 3 41749fbd63 Talk:1-Androsterone 41749fbd63 3239573 41749fbd63 Talk:16 α -LE2 41749fbd63 12 41749fbd63 Talk:(S)-Equol 41749fbd63 Talk:15 β -Hydroxycyproterone acetate 41749fbd63 Talk:(von Zumbusch) acute generalized pustular psoriasis 41749fbd63

Marine food web There has been increasing recognition in recent years concerning marine microorganisms. Higher order consumers complete the web. The diagram A marine food web is a food web of marine life. The second trophic level (primary consumers) is occupied by zooplankton which feed off the phytoplankton. At the base of the ocean food web are single-celled algae and other plant-like organisms known as phytoplankton. Incorporation of cryptic interactions into models is especially important for those interactions involving the transport of nutrients or energy 41749fbd63

Stimulant 10 (5): 611. Nehlig
Stimulants (also known as central nervous system stimulants, or psychostimulants, or colloquially as uppers) are a class of drugs that increase alertness. Nutrients. Some stimulants occur naturally, while others are exclusively synthetic. 3390/nu10050611. "Caffeine-

Related Deaths: Manner of Deaths and Categories at Risk". They are used for various purposes, such as enhancing attention, motivation, cognition, mood, and physical performance. doi:10. Stimulants may be subject to varying forms of regulation, or outright prohibition, depending on jurisdiction. PMC 5986491. PMID 29757951. Common stimulants include caffeine, nicotine, amphetamines, cocaine, methylphenidate, and modafinil 41749fbd63

History of the Philippines some bones
smashed open, suggesting that the
early humans were after the nutrient-
rich marrow. A 2023 study dated the
age of fossilized remains of Homo
luzonensis The history of the
Philippines dates from the earliest
hominin activity in the archipelago at
least by 709,000 years ago. Homo
luzonensis, a species of archaic
humans, was present on the island of
Luzon at least by 134,000 years ago

Protist Protists do not form a natural group, or clade, but are a paraphyletic grouping of all descendants of the last eukaryotic common ancestor excluding land plants, animals, and fungi. most abundant in coastal waters that receive nutrient-rich run-off from land, and areas where nutrient-rich deep ocean water reaches the surface, namely A protist (PROH-tist) or protoctist is any eukaryotic organism that is not an animal, land plant, or fungus

With the advent of phylogenetic analysis and electron microscopy studies, the use of Protista as a formal taxon was gradually abandoned. In modern classifications, protists are spread across several eukaryotic clades called supergroups, such as Archaeplastida (photoautotrophs that includes land plants), SAR, Opisthokonta (which includes fungi and animals), Amoebozoa and "Excavata". 41749fbd63 20 41749fbd63 Habitats lead to variations in food webs. Networks of trophic interactions can also provide a lot of information about the

functioning of marine ecosystems.
