The River Rouge Complex manufactured most of the components of Ford vehicles, starting with the Model T. Much of the production was devoted to compiling "knock-down kits" that were then shipped in wooden crates to Branch Assembly locations across the United States by railroad and assembled locally, using local supplies as necessary. A few of the original Branch Assembly locations still remain while most have been repurposed or have been demolished and the land reused. Knock-down kits were also shipped... 349a7e7a3d Unrelated to the Nissan-developed Mercury Villager, the Windstar was marketed without a Lincoln-Mercury counterpart. Due to the engine's unusual and aesthetically pleasing appearance it is sometimes transplanted into other vehicles. Its distinctive variable length intake manifold is bilaterally symmetrical, so it can be rotated 180 degrees (making it face "backwards" on the engine, relative to its original installation orientation) to ease the engine's transition from transverse to longitudinal mounting. 349a7e7a3d In contrast with standard versions of the Taurus, the Taurus SHO did not have a Mercury Sable counterpart; however, the 2010–2019 SHO served as the basis for the Ford Police Interceptor Sedan (replacing the long-running Ford Crown Victoria Police Interceptor).
