Indices are a common navigation feature in many types of reference works. Many reference works are put together by a team of contributors whose work is coordinated by one or more editors, rather than by an individual author. Updated editions are usually published as needed, in some cases annually, such as Whitaker's Almanack, and Who's Who. 96c1a3c875

Chinese dictionary Because tens of thousands of characters have been used in written Chinese, Chinese lexicographers have developed a number of methods to order and sort characters to facilitate more convenient reference. dictionaries regularly used in the Chinese language: 'character dictionaries' (字典; zìdiǎn) list individual Chinese characters, and 'word dictionaries' There are two types of dictionaries regularly used in the Chinese language: 'character dictionaries' (字典; zìdiǎn) list individual Chinese characters, and 'word dictionaries' (词典; cídiǎn) list words and phrases 96c1a3c875

here all are supported by technical and professional usage, but they cannot be represented as mandatory or undebatable; readers must use their judgement. Authors often use terms arbitrarily, or coin them to taste, possibly in ignorance of established terms, and it is not always clear whether because of ignorance, or personal preference, or because usages change with time or context, or because of variation between specimens, even specimens from the same plant. For example, whether to call leaves on the same tree "acuminate", "lanceolate", or "linear" could depend on individual judgement, or which part of the tree one collected them from. The same cautions might apply to "caudate", "cuspidate", and "mucronate", or to... 96c1a3c875

Many techniques have been researched, including dictionary-based methods that use the knowledge encoded in lexical resources, supervised machine learning methods in which a classifier is trained for each distinct word on a corpus of manually sense-annotated examples, and completely unsupervised methods that cluster occurrences of words, thereby inducing word senses. Among these, supervised

learning approaches have been the most successful algorithms to date. 96c1a3c875 Chinese dictionaries have been published for over two millennia, beginning in the Han dynasty. A broad distinction is made between general and specialized dictionaries. Specialized dictionaries include words in specialist fields, rather than a comprehensive range of words in the language. Lexical items that describe concepts in specific fields are usually called terms instead of words, although there is no consensus whether lexicology and terminology are two different fields of study. In theory, general dictionaries are supposed to be semasiological, mapping word to definition, while specialized dictionaries are supposed to be onomasiological, first identifying concepts and then establishing the terms used to designate them. In practice, the two approaches are used for both types. There are other types of dictionaries that do not fit neatly into the above distinction...

96c1a3c875 The phrase probably became known to English scholars through "Pericles' Funeral Oration", as mentioned in Thucydides' History of the Peloponnesian War.
