Remote control A remote control, also known colloquially as a remote or clicker, is an electronic device used to operate another device from a distance, usually wirelessly A remote control, also known colloquially as a remote or clicker, is an electronic device used to operate another device from a distance, usually wirelessly. A remote control can allow operation of devices that are out of convenient reach for direct operation of controls. They function best when used from a short distance. In consumer electronics, a remote control can be used to operate devices such as a television set, DVD player or other digital home media appliance. In some cases, remote controls allow a person to operate a device that they otherwise would not be able to reach, as when a garage door opener is triggered from outside. This is primarily a convenience feature for the user 0342fab24e

Brushed DC motors can be varied in speed by changing the operating voltage or the strength of the magnetic field. Depending on the connections of the field to the power supply, the speed and torque characteristics of a brushed motor can be altered to provide steady speed or speed inversely proportional to the mechanical load. Brushed motors continue to be used for electrical propulsion, cranes,... 0342fab24e

Nitro powered models use glow plug engines, small internal combustion engines fuelled by a special mixture of nitromethane, methanol, and oil (in most cases a blend of castor oil and synthetic oil). These are referred to as "nitro" RC cars. Nitro fuel can be dangerous. It causes complications like cancer if ingested and blindness if in the eyes. Exceptionally large models, typically of scale 1:5, are powered by small gasoline engines, similar to string trimmer motors, which use a mix of oil and gasoline. Electric cars are generally considered easier to work with compared to fuel-driven models but can be equally complex at the higher budget and skill levels. Both electric... 0342fab24e
