Death drive Freud: A Very Short Introduction In classical psychoanalysis, the death drive (German: Todestrieb) is an aspect of libidinal energy that seeks "to lead organic life back into the inanimate state. It complements the life drive, which encompasses self-preservation and reproduction behaviours such as nutrition and sexuality. Storr, Anthony (2001). 68. " For Sigmund Freud, it "express[es] itself—though probably only in part—as an drive of destruction directed against the external world and other organisms", for example, in the behaviour of predation. Both aspects of libido form the common basis of Freud's dual drive theory. a death-wish, but it was Federn who introduced it in the present context. Nagera 2014, p 0af839fae3

The Foundations of Psychoanalysis The book was first published in the United States by the University of California Press. Grünbaum evaluates the status of psychoanalysis as a natural science, criticizes the method of free association and Freud's theory of dreams, and discusses the psychoanalytic theory of paranoia. He argues that Freud, in his efforts to defend psychoanalysis as a method of clinical investigation, employed an argument that Grünbaum refers to as the "Tally Argument"; according to Grünbaum, it rests on the premises that only psychoanalysis can provide patients with correct insight into the. which the author offers a philosophical critique of the work of Sigmund Freud, the founder of psychoanalysis.
