The earlier photochemical film process, referred to as color timing, was performed at a film lab during printing by varying the intensity and color of light used to expose the rephotographed image. Since, with this process alone, the user was unable to immediately view the outcome of their changes, the use of a Hazeltine color analyzer was common for viewing these modifications in real time. In the 2000s, with the increase of digital... 5b17d9ae1f == Show format and subject matter == 5b17d9ae1f

== Biography == Color grading and color correction are often used synonymously as terms for this process and can include the generation of artistic color effects through creative blending and compositing of different layer masks of the

source image. Color grading is generally now performed in a digital process either in a controlled environment such as a color suite, and is usually done in a dim or dark environment. 5b17d9ae1f Episodes typically star fictional Photoshop user Donnie Hoyle, who demonstrates tools and techniques in Photoshop, usually on a Macintosh computer. Donnie is a person with severe and chronic personal problems relating to his job, his relationships and disintegrating marriage; various legal problems, career and emotional problems; which tend to weave themselves into the narrative to dark comedic effect. Each episode's title card is further distinguished by a different misspelling which can be interpreted as part of the joke of each episode or is spelled so as to suggest an off-color reference. Further clues to Donnie's state of mind can probably be inferred... 5b17d9ae1f
