German automotive enterprise, Volkswagen Group. It is based on the principles of a continuously variable transmission (CVT) popularised by DAF, but differs from other CVTs by using an unconventional type of steel chain consisting of parallel flat chain segments. Unlike the conventional CVT push belt, the Multitronic chain uses tension to transfer forces. Quattro was first introduced in 1980 on the permanent four-wheel drive Audi Quattro model, often referred to as the Ur-Quattro (meaning "original" or "first"). The term quattro has since been applied to all subsequent Audi AWD models. Due to the nomenclature rights derived from the trademark, the word quattro is now always spelled with a lower case "q" by the manufacturer, in honour of its former namesake. Multitronic is a term originally coined in the original series of Star Trek (see season two, episode 24: The Ultimate Computer). Since the Volkswagen Group is German, official internal combustion engine performance ratings are published using the International System of Units (commonly abbreviated "SI"), a modern form of the metric system of figures. Motor vehicle engines will have been tested by a Deutsches Institut für Normung (DIN) accredited testing facility, to either the original 80/1269/EEC, or the later 1999/99/EC standards. The standard initial measuring unit for establishing the rated motive power output is the kilowatt (kW); and in their official literature, the power rating may be published in either the kW, or the metric horsepower (often abbreviated...
