computer system manufacturers A computer is a machine that can be programmed to automatically carry out sequences of arithmetic or logical operations (computation). The term computer system may refer to a nominally complete computer that includes the hardware, operating system, software, and peripheral equipment needed and used for full operation; or to a group of computers that are linked and function together, such as a computer network or computer cluster. Modern digital electronic computers can perform generic sets of operations known as programs, which enable computers to perform a wide range of tasks
