General relativity General relativity, also known as the general theory of relativity, and as Einstein's theory of gravity, is the geometric theory of gravitation published by Albert Einstein in 1915 and is the accepted description of gravitation in modern physics. speed of light. These are one of several analogies between weak-field gravity and electromagnetism in that, they are analogous to electromagnetic waves. General relativity generalizes special relativity and refines Newton's law of universal gravitation, providing a unified description of gravity as a geometric property of space and time, or four-dimensional spacetime. The relation is specified by the Einstein field equations, a system of second-order partial differential equations. In particular, the curvature of spacetime is directly related to the energy, momentum and stress of whatever is present, including matter and radiation a2c2b3850c

It can be generated using WPCleaner by any user. It's possible to update this page by following the procedure below: a2c2b3850c Create a command file, for example ListCheckWiki1148A.txt with the following contents: a2c2b3850c Run WPCleaner in the command line with a command such as: a2c2b3850c November 9 > a2c2b3850c

Wikipedia:Reference desk/Archives/Science/November 2005 frequencies are at the lowest end of the electromagnetic spectrum; it's the high end ones that are dangerous (like Gamma rays and x-rays. smurrayinchester(User) a2c2b3850c
