History of science Protoscience, early sciences, and natural philosophies such as alchemy and astrology that existed during the Bronze Age, Iron Age, classical antiquity and the Middle Ages, declined during the early modern period after the establishment of formal disciplines of science in the Age of Enlightenment. 1275–1326) produced the first known anatomy textbook based on human dissection. It encompasses all three major branches of science: natural, social, and formal. As a result of the Pax Mongolica, Europeans, such as The history of science covers the development of science from ancient times to the present.
