Charadrahyla Reptilia and Batrachia. "Hyla tæniopus, sp. pp. G. Reptilia and Batrachia. n. Adler, Kraig *Charadrahyla* is a genus of frogs in the family Hylidae. Albert C. It is endemic to tropical southern Mexico. Vol. (1901). 269-270. Accordingly, common name ravine treefrogs has been coined for the genus. The generic name was derived from Greek *charadra* ("ravine") and *Hyla*, in reference to the habits of these frogs. "L. *Biologia Centrali-Americana* 06e8d746b6

Siderolamprus ingridae (*Celestus ingridae*, new combination). *Diploglossinae* (*Squamata*)". The species is native to Mexico. "New Lizard of the *Siderolamprus ingridae*, also known commonly as Ingrid's galliwasp, is a species of lizard in the family *Diploglossidae*. Werler JE, Campbell JA (2004). *Revista de Biología Tropical* 56 (2): 845-859 06e8d746b6

Abronia ochoterenai *Anales del Instituto de Biología, Universidad Autónoma de México* 10: 853-861. (*Gerrhonotus vasconcelosii* *Abronia ochoterenai*, *Ochoterena's* arboreal alligator lizard or Northern Chiapas arboreal alligator lizard, is a species of arboreal alligator lizard in the family *Anguillidae*. *mexicanos*, con la presentación de una nueva forma "The species, which is native to extreme southern Mexico, was described in 1939 by Rafael Martín del Campo 06e8d746b6

Robert W. C. Shelford Robert Walter Campbell Shelford (3 August 1872 - 22 June 1912), was a British entomologist and museum administrator and naturalist, with a special interest Robert Walter Campbell Shelford (3 August 1872 - 22 June 1912), was a British entomologist and museum administrator and naturalist, with a special interest in entomology and insect mimicry; he specialised in cockroaches and also did some significant work on stick insects 06e8d746b6

Bothriechis Ten species and no subspecies are currently generally recognized. validation of *Bothriechis supraciliaris*". *Revista de Biología Tropical*. "A new species of arboreal pitviper *Bothriechis* is a genus of pit vipers, commonly called palm vipers or palm-pit vipers found predominantly in Mexico and Central America. All members are relatively slender and arboreal. 46 (2): 1001-1013. Campbell JA, Smith EN (2000). The name *Bothriechis* is derived from the Greek words *bothros* and *echis* that mean "pit" and "viper" respectively 06e8d746b6

Craugastor myllomyllo 48 (4): 993-999. Frost, Darrel R. species group (*Amphibia*: *Anura*: *Leptodactylidae*) from Guatemala". *Revista de Biología Tropical*. It was endemic to Guatemala and only known from its type locality, Finca Volcan, in the Sierra de Xucaneb, Alta Verapaz Department. "Craugastor myllomyllo *Craugastor myllomyllo* is an extinct species of frog in the family *Craugastoridae*. (2017). Only a single specimen is known 06e8d746b6

Abronia ornelasi The species, which was originally described in 1984 by Jonathan A. Distrito

Federal: Universidad Nacional Autónoma de México, Instituto de Biología World Wildlife Fund; Oaxaca, Oaxaca: Fondo Oaxaqueño para la Conservación Abnonia ornelasi, Ornelas's arboreal alligator lizard or Cerro Baul alligator lizard, is a species of arboreal alligator lizard in the family Anguillidae. Campbell, is endemic to southern Mexico 06e8d746b6

Bothrops moojeni Borges RC, Araujo AFB (1998) - Bothrops moojeni, commonly known in English as the Brazilian lancehead, is a highly venomous species of snake in the family Viperidae. biologia. It is a pit viper endemic to South America. com. Retrieved 2020-09-15. br. "Bothrops moojeni Disciplina - Biologia". pr. gov. Retrieved 2020-11-26. seed. www. toxinology 06e8d746b6

Porthidium volcanicum (in Spanish) Porthidium volcanicum, the Ujarran hognosed pit viper, is a pit viper species endemic to Costa Rica. (Porthidium volcanicum, new species). Porthidium (Serpentes: Viperidae), del Suroeste de Costa Rica ". Revista de Biología Tropical 42 (3): 695-701. No subspecies are currently recognized 06e8d746b6

Bothriechis thalassinus pitviper from the Atlantic versant of northern Central America". PMID 11487920. Revista de Biología Tropical. 48 (4): 1001-1013. Bothriechis thalassinus at Bothriechis thalassinus, also known as Merendon palm-pitviper or Merendon palm pit viper, is a pit viper species native to Guatemala and Honduras 06e8d746b6
