== A == Hand knitting needles are either straight and cylindrical or in the round with plastic tubes or wire (cables) joining the ends of both. Knitted fabric consists of a number of consecutive rows of connected loops that intermesh with the next and previous rows. As each row is formed, each newly created loop is pulled through one or more loops from the prior row and placed on the 'gaining needle' (the needle that is receiving newly created stitches) so that the loops from the prior row can be pulled off the other needle without unraveling.

Drop-stitch knitting idea is to knit a solid fabric, then (deliberately) drop one or more stitches (i. e. , draw a loop out from the loop below it, and so on repeatedly), producing Drop-stitch knitting is a knitting technique for producing open, vertical stripes in a garment. The basic idea is to knit a solid fabric, then (deliberately) drop one or more stitches (i. e. e. The run will continue to the bottom (i. , draw a loop out from the loop below it, and so on repeatedly), producing a run (or ladder) in the fabric. , cast-on) edge of the garment, or until it encounters an increase, at which it stops

During the Renaissance era, needlepoint evolved into a more detailed craft and Venice became a key center... Drop-stitch runs are an easy way to get the "see-through" effect of lace, but with a much more casual look. The designer can make interesting arrangements of open stripes (of whatever length); the endpoints of the stripe are specified by the initial increase and the point at which the first stitch was dropped. Drop-stitch stripes are usually vertical, since they follow the grain of the knitting, i.e., the wales, the columns of dependent loops. However, the grain of the knitting can be made off-vertical,

e.g., in entrelac or by increasing on one edge and decreasing on the other. A drop-stitch that does not produce a vertical stripe (or a run) occurs when the initial increase happens in the middle of a stitch (wrap the yarn over the right needle multiple times during... Differences in yarn (varying in fiber type, weight, uniformity, twist, needle size, and stitch type) allow for a variety of knitted fabrics with different properties, including color, texture, thickness, heat retention, water resistance, and integrity... == Characters introduced in *Lilo & Stitch* (2002) ==

The degree of detail in needlepoint depends on the thread count of the underlying mesh fabric. Due to the inherent lack of suppleness of needlepoint, common uses include eyeglass cases, holiday ornaments, pillows, purses, upholstery, and wall hangings.

Knitting needle (the needle that is receiving newly created stitches) so that the loops from the prior row can be pulled off the other needle without unraveling Knitting is the process of interlooping yarn to create textile fabric made of interconnected loops, done by hand, machine or both

== Overview == Methods == Development on a live-action remake of *Lilo & Stitch* began in October 2018, with writer Mike Van Waes and producers Dan Lin and Jonathan Eirich attached. By November 2020, Jon M. Chu was in talks to direct, while Van Waes left the project despite still being credited. All cross-stitch fabrics are technically "evenweave" as the term refers to the fact that the fabric is woven to make sure that there are the same number of threads per inch in both the warp and the weft (i.e. vertically and horizontally). Fabrics are categorized by threads per inch (referred...

2a938668d6 Sewing is the craft of fastening or attaching objects using stitches made with needle and thread. Sewing is one of the oldest of the textile arts, arising in the Paleolithic Era. Although usually associated with clothing and household linens, sewing is used in a variety of crafts and industries, including shoemaking, upholstery, sailmaking, bookbinding and the manufacturing of some kinds of sporting goods. Sewing is the fundamental process underlying a variety of textile arts and crafts, including embroidery, tapestry, quilting, appliqué and patchwork. 2a938668d6 The roots of needlepoint go back thousands of years to the ancient Egyptians, who used small slanted stitches to sew up their canvas tents. Howard Carter, of Tutankhamen fame, found some needlepoint in the cave of a Pharaoh who had lived around 1500 BC.

2a938668d6 Knitting creates stitches: loops of yarn in a row. When done by hand, the loops are created with a pair of knitting needles where the loops are created one at a time. When done by machine the loops are created on hook type needles that work on the entire row of knitting at a time. 2a938668d6

Sometimes cross-stitch is done on designs printed on the fabric (stamped cross-stitch); the stitcher simply stitches over the printed pattern. Cross-stitch is often executed on easily countable fabric called aida cloth, whose weave creates a plainly visible grid of squares

with holes for the needle at each corner. This form of cross-stitch is also called counted cross-stitch in order to distinguish it from other forms of cross-stitch. The stitcher counts the threads on a piece of evenweave fabric (such as linen) in each direction so that the stitches are of uniform size and appearance

Needlepoint Traditionally needlepoint designs completely cover the canvas. stitch Parisian stitch – Embroidery stitch used in needlepoint and canvas work Smyrna stitch – Form of cross stitch used in needlepoint Tent stitch – Needlepoint is a type of canvas work, a form of embroidery in which yarn is stitched through a stiff open weave canvas. Although needlepoint may be worked in a variety of stitches, many needlepoint designs use only a simple tent stitch and rely upon color changes in the yarn to construct the pattern. Needlepoint is the oldest form of canvas work

== History == Modern needlepoint descends from the canvas work in tent stitch, done on an evenly woven open ground fabric that was a popular domestic craft in the 16th century. Continuing where Stitch!
