

Textbook Of Occupational Medicine

The World Federation of Occupational Therapists (WFOT) defines occupational therapy as "a client-centred health profession concerned with promoting health and wellbeing through occupation. The primary goal of occupational therapy is... 37a9597729

Occupational hygiene for biological hazards (see Microbiology, Tropical medicine, Infection). These hazards or stressors are typically divided into the categories biological, chemical, physical, ergonomic and psychosocial. For chemicals, the hazard can be understood by the dose response profile most often based on toxicological studies or models. The risk of a health effect from a given stressor is a function of the hazard multiplied by the exposure to the individual or group. Environmental and occupational hygienists are considered experts in exposure science. Occupational hygiene or industrial hygiene (IH) is the anticipation, recognition, evaluation, control, and confirmation (ARECC) of protection from risks associated with exposures to hazards in, or arising from, the workplace that may result in injury, illness, impairment, or affect the well-being of workers and members of the community. Occupational hygienists work closely with toxicologists (see Toxicology) 37a9597729

Occupational medicine Occupational and Environmental Medicine (OEM), previously called industrial medicine, is a board certified medical specialty under the American Board of Occupational and Environmental Medicine (OEM), previously called industrial medicine, is a board certified medical specialty under the American Board of Preventative Medicine that specializes in the prevention and treatment of work-related illnesses and injuries 37a9597729

Occupational asthma It is an Occupational asthma is new onset asthma or the recurrence of previously quiescent asthma directly caused by exposure to an agent at workplace. It is an occupational lung disease and a type of work-related asthma. Agents that can induce occupational asthma can be grouped into sensitizers and irritants. Occupational asthma is new onset asthma or the recurrence of previously quiescent asthma directly caused by exposure to an agent at workplace 37a9597729

Occupational therapist Human occupations include activities of daily living, work/vocation, play, education, leisure,

rest and sleep, and social participation. They enable individuals across the lifespan by optimizing their abilities to perform activities that are meaningful to them ("occupations"). OTs and occupational therapists (OTs) are health care professionals specializing in occupational therapy and occupational science. OTs have training in the physical, psychological, and social aspects of human functioning deriving from an education grounded in anatomical and physiological concepts, and psychological perspectives. OTs and occupational therapy assistants (OTAs) use scientific bases and a holistic perspective to promote a person's ability to fulfill their daily routines and roles. Occupational therapists (OTs) are health care professionals specializing in occupational therapy and occupational science 37a9597729

The spectrum of topics is broad, ranging from wound ballistics to medical ethics, and from considerations of harsh environments to applied biomedicine. The TMM series is intended to be tri-service in scope, although the majority of contributors are affiliated with the U.S. Army. 37a9597729

Medicine Contemporary medicine applies biomedical sciences, biomedical research, genetics, and medical technology to diagnose, treat, and prevent injury and disease, typically through pharmaceuticals or surgery, but also through therapies as diverse as psychotherapy, external splints and traction, medical devices, biologics, and ionizing radiation, amongst others. Occupational medicine is the provision of health advice to organizations and individuals to ensure that the highest standards of health and Medicine is the science and practice of caring for patients, managing the diagnosis, prognosis, prevention, treatment, palliation of their injury or disease, and promoting their health. Medicine encompasses a variety of health care practices evolved to maintain and restore health by the prevention and treatment of illness. purposes 37a9597729

Sensitizer-induced occupational asthma is an immunologic form of asthma which occurs due to inhalation of specific substances (i.e., high-molecular-weight proteins from plants and animal origins, or low-molecular-weight agents that include chemicals, metals and wood dusts) and occurs after a latency period of several weeks to years. 37a9597729

Textbook of Military Medicine The books integrate lessons learned in past wars with current principles and practices of military medical doctrine. The Textbook of Military Medicine (TMM) is a series of volumes on military medicine published since 1989 by the Borden Institute, of the Office of The The Textbook of Military Medicine (TMM) is a series of volumes on military medicine published since 1989 by the Borden Institute, of the Office of The Surgeon General, of the United States Department of the Army. It constitutes a comprehensive, multi-volume treatise on the art and

science of military medicine, as practiced by the United States armed forces 37a9597729

Performing arts medicine is an outgrowth of occupational and physical medicine concerned with the medical complaints of musicians, dancers, actors and other performing artists. Medical issues can range from pain in performance to neuro-muscular dysfunction or psychological problems related to performance. The awkward positions and repetitive motions commonly required of performing artists can lead to these and other problems. Medical problems related to performance are common among musicians: according to a 1987 survey of musicians, "Eighty-two percent said they experienced a medical problem... 37a9597729

Occupational therapy Occupational science, the study of humans as 'doers' or 'occupational beings', was developed by inter-disciplinary scholars, including occupational therapists, in the 1980s. Occupational therapy is based on the assumption that engaging in meaningful activities, also referred to as occupations, is a basic human need and that purposeful activity has a health-promoting and therapeutic effect. Dunton struggled with "the cumbersomeness of the term occupational therapy"; Occupational therapy (OT), also known as ergotherapy, is a healthcare profession. Ergotherapy is derived from the Greek ergon which is allied to work, to act and to be active. foundation for the textbook he published in 1919 entitled Reconstruction Therapy 37a9597729

OTs work in a variety of fields... 37a9597729 OEM physicians are trained in both clinical medicine and public health. They may work in a clinical capacity providing direct patient care to workers through worker's compensation programs or employee health programs and performing medical screening services for employers. Corporate medical directors are typically occupational medicine physicians who often have specialized training in the hazards relevant to their industry. OEM physicians are employed by the US military in light of the significant and unique exposures faced by this... 37a9597729

Outline of medicine pregnancy Occupational medicine – branch of medicine concerned with the maintenance of health in the workplace Oncology – branch of medicine that studies The following outline is provided as an overview of and topical guide to medicine: 37a9597729

Medicine has been practiced since prehistoric times, and for most of this time it was an art (an area of creativity and... 37a9597729 Medicine – science of healing. It encompasses a variety of health care practices evolved to maintain health by the prevention and treatment of illness. 37a9597729 Irritant-induced (occupational) asthma is a

non-immunologic form of asthma that results from a single or multiple high dose exposure to irritant products. It is usually... 37a9597729

Occupational lung disease Occupational lung diseases comprise a broad group of diseases, including occupational asthma, industrial bronchitis, chronic obstructive pulmonary disease Occupational lung diseases comprise a broad group of diseases, including occupational asthma, industrial bronchitis, chronic obstructive pulmonary disease (COPD), bronchiolitis obliterans, inhalation injury, interstitial lung diseases (such as pneumoconiosis, hypersensitivity pneumonitis, lung fibrosis), infections, lung cancer and mesothelioma. Occupational cases of interstitial lung disease may be misdiagnosed as COPD, idiopathic pulmonary fibrosis, or a myriad of other diseases; leading to a delay in identification of the causative agent. These can be caused directly or due to immunological response to an exposure to a variety of dusts, chemicals, proteins or organisms 37a9597729

Performing arts medicine dancers. It deals with injuries and the prevention of injuries to performing artists, particularly musicians and dancers. Performing arts medicine is an outgrowth of occupational and physical medicine concerned with the medical complaints of musicians, dancers, actors Performing arts medicine is a branch of medicine that emerged in the late 20th century 37a9597729
