As an alkyne, acetylene is unsaturated because its two carbon atoms are bonded together in a triple bond. The carbon-carbon triple bond places all four atoms in the same straight line, with CCH bond angles of 180°. The triple bond in acetylene results in a high energy content that is released when acetylene is burned. 61f17e279a Since 2015 the company has been part of Atomenergomash, the mechanical engineering division of Rosatom.
